

Serum Animal Biological Fluid

Normal Donkey Serum

CATALOG #
AAA107954

HOST
Donkey

PRODUCT SYNONYMS

Serum; Normal Donkey Serum; Serum animal biological fluid

PRODUCT SPECIFICATIONS

Host	Donkey
Purity/Purification	Lipid extracted and dialyzed against 10 mM Sodium Phosphate, 0.15 M Sodium Chloride, pH 7.2
Concentration	10ml, lyophilized (varies by lot)
Source Note	Normal Donkey Serum was obtained from healthy donors of US origin.
Biological Significance	In blood, the serum is the component that is neither a blood cell (serum does not contain white or red blood cells) nor a clotting factor; it is the blood plasma with the fibrinogens removed. Serum includes all proteins not used in blood clotting and all the electrolytes, antibodies, antigens, hormones, and any exogenous substances (e.g., drugs and microorganisms).
Species	Donkey
Form	Lyophilized from 10mM sodium phosphate, 0.15M sodium chloride, pH 7.2 with no preservatives. Rehydrate with 11 ml of deionized water. Allow reconstituted product to stand for at least 30 minutes at room temperature prior to dilution. If necessary, centrifuge to remove any particles. Prepare fresh working solution daily.
Biohazard	Normal Donkey serum was obtained from healthy animals of US origin and under the care of a registered veterinarian. Use appropriate laboratory precautions when handling this product.
Preparation and Storage	Ships ambient or refrigerated. Upon receipt, store at 4°C while lyophilized. After reconstituted, add a preservative and store at 4 °C or aliquot and freeze at -20°C or below. Avoid repeat freeze-thaws.

ADDITIONAL INFORMATION

Related Product Information for Serum animal biological fluid	Normal Donkey Serum which has been lipid extracted and dialyzed against 10 mM Sodium Phosphate, 0.15 M Sodium Chloride, pH 7.2
Product Categories/Family for Serum animal biological fluid	Veterinary ; Serum ; Plasma & Blood ; Animal Serum

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
