PRODUCT SPECIFICATIONS

Host	Oryza sativa (rice)
Purity/Purification	Purity as determined by SDS-PAGE is 97%.
Form/Format	The protein (1mg/ml) was lyophilized with no additives.
Sequence Length	698
Physical Appearance	Sterile Filtered lyophilized (freeze-dried) powder.
Iron Content	The average amount of Ferric Iron is 0.4-0.5 ug per mg of protein (protein concentration is measured by absorption at 280 nm).
Activity	One mg of Recombinant Human Transferrin will bind to approximately 2 micrograms of Fe.
Solubility	Stock solutions can be prepared by dissolving gently into PBS for several minutes. Recommended stock concentrations are 5 mg/ml to 20 mg/ml in PBS, though others can be used as well. Please try to avoid the formation of bubbles when dissolving the protein. Sterile filter through 0.2 um filter.
Preparation and Storage	Lyophilized Transferrin although stable at room temperature for 3 weeks, should be stored desiccated below -18 degree C. Upon reconstitution Transferrin Human Recombinant should be stored at 4 degree C between 2-7 days and for future use below -18 degree C. For long term storage it is recommended to add a carrier protein (0.1% HSA or BSA). Please prevent freeze-thaw cycles.
