ADDITIONAL INFORMATION

Related Product Information for MMP-13 elisa kit	Principle of the Assay: This kit is an Enzyme-Linked Immunosorbent Assay (ELISA). The plate has been pre-coated with Mouse MMP-13 antibody. MMP-13 present in the sample is added and binds to antibodies coated on the wells. And then biotinylated Mouse MMP-13 Antibody is added and binds to MMP-13 in the sample. Then Streptavidin-HRP is added and binds to the Biotinylated MMP-13 antibody. After incubation unbound Streptavidin-HRP is washed away during a washing step. Substrate solution is then added and color develops in proportion to the amount of Mouse MMP-13. The reaction is terminated by addition of acidic stop solution and absorbance is measured at 450 nm. Intended Uses: This sandwich kit is for the accurate quantitative detection of Mouse matrix metalloproteinase 13 (also known as MMP-13) in serum, plasma, cell culture supernates, Ascites, tissue homogenates or other biological fluids.
