

## Phosphoprotein p30 (Ba71V-93) Recombinant Protein | Ba71V-93 recombinant protein

Recombinant African swine fever virus Phosphoprotein p30 (Ba71V-93)

CATALOG #  
**AAA114894**

HOST  
**E Coli or Yeast or Baculovirus or Mammalian Cell**

### PRODUCT SYNONYMS

Phosphoprotein p30 (Ba71V-93); Recombinant African swine fever virus Phosphoprotein p30 (Ba71V-93); Ba71V-93 recombinant protein

### PRODUCT SPECIFICATIONS

|                         |                                                                                                                                                                                                                                        |
|-------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Host                    | E Coli or Yeast or Baculovirus or Mammalian Cell                                                                                                                                                                                       |
| Purity/Purification     | Greater or equal to 85% purity as determined by SDS-PAGE.                                                                                                                                                                              |
| Form/Format             | Lyophilized or liquid (Format to be determined during the manufacturing process)                                                                                                                                                       |
| Sequence Positions      | 1-204aa; Full Length                                                                                                                                                                                                                   |

| Species                 | African swine fever virus (strain Badajoz 1971 Vero-adapted) (Ba71V) (ASFV)                                                                                                                                                            |
| Preparation and Storage | Store at -20 degrees C. For long-term storage, store at -20 degrees C or -80 degrees C. Store working aliquots at 4 degrees C for up to one week. Repeated freezing and thawing is not recommended.                                    |

### NCBI AND UNIPROT INFORMATION

|                            |                          |
|----------------------------|--------------------------|
| NCBI GI #                  | 9628200                  |
| NCBI GeneID                | 22220322                 |

| UniProt Accession #        | P34204                   |
| Molecular Weight           | 23,555 Da                |
| NCBI Official Full Name    | ASFV-induced protein p32 |
| NCBI Official Symbol       | CP204L                   |
| NCBI Protein Information   | ASFV-induced protein p32 |
| UniProt Protein Name       | Phosphoprotein p30       |
| UniProt Gene Name          | <b>Ba71V-93</b>          |
| UniProt Synonym Gene Names | p30; p32                 |

**For Research Use Only.** Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
