

## Mouse Chenodeoxycholic acid Monoclonal Antibody | anti-CDCA antibody

Mouse anti- Chenodeoxycholic acid monoclonal Antibody

|                               |                      |                              |
|-------------------------------|----------------------|------------------------------|
| CATALOG #<br><b>AAA117781</b> | HOST<br><b>Mouse</b> | APPLICATIONS<br><b>ELISA</b> |
|-------------------------------|----------------------|------------------------------|

### PRODUCT SYNONYMS

Chenodeoxycholic acid; Monoclonal Antibody; Mouse anti- Chenodeoxycholic acid monoclonal Antibody; Chenodiol; chenix; chenic acid; chenodeoxycholate; gallodesoxycholic acid; chendol; chenofalk; chenodesoxycholic acid; anti-CDCA antibody

### PRODUCT SPECIFICATIONS

|                                                |                                                                                                                |
|------------------------------------------------|----------------------------------------------------------------------------------------------------------------|
| Host                                           | Mouse                                                                                                          |
| Clonality                                      | Monoclonal                                                                                                     |
| Isotype                                        | IgG2b                                                                                                          |
| Specificity                                    | No significant cross-reactivity or interference was observed                                                   |
| Purity/Purification                            | >95%, Protein G Purified                                                                                       |
| Applicable Applications for anti-CDCA antibody | ELISA                                                                                                          |
| Storage Buffer                                 | Preservative: 0.03% Proclin 300<br>Constituents: 50% Glycerol, 0.01M PBS, PH 7.4                               |
| Conjugate                                      | Non-conjugated                                                                                                 |
| Immunogen                                      | Chenodeoxycholic acid-BSA conjugate                                                                            |
| Preparation and Storage                        | Shipped at 4 degree C. Upon delivery aliquot and store at -20 degree C or -80 degree C. Avoid repeated freeze. |

**For Research Use Only.** Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
