### PRODUCT SYNONYMS

Moloney murine leukemia virus Gag polyprotein; Polyclonal Antibody; Rabbit anti-Moloney murine leukemia virus Gag polyprotein polyclonal Antibody; FITC; Gag polyprotein (Pr65gag) (Core polyprotein) [Cleaved into: Matrix protein p15 (MA); RNA-binding phosphoprotein p12 (pp12); Capsid protein p30 (CA); Nucleocapsid protein p10-Gag (NC-gag)]; gag; anti-gag antibody

### PRODUCT SPECIFICATIONS

|                         |                                                                                  |
|-------------------------|----------------------------------------------------------------------------------|
| Host                    | Rabbit                                                                           |
| Reactivity              | Moloney murine leukemia virus                                                    |
| Clonality               | Polyclonal                                                                       |
| Isotype                 | IgG                                                                              |
| Specificity             | Moloney murine leukemia virus                                                    |
| Purity/Purification     | >95% Protein G purified                                                          |
| Form/Format             | Liquid                                                                           |
| Sequence Length         | 538                                                                              |
| Storage Buffer          | Preservative: 0.03% Proclin 300<br>Constituents: 50% Glycerol, 0.01M PBS, PH 7.4 |
| Conjugate               | FITC                                                                             |
| Immunogen Species       | Moloney murine leukemia virus                                                    |
| Research Area           | Others                                                                           |
| Target Names            | gag                                                                              |
| Immunogen               | Recombinant Moloney murine leukemia virus Gag polyprotein protein (216-478AA)    |
| Preparation and Storage | Upon receipt store at -20 degree C or -80 degree C. Avoid repeated freeze.       |

### NCBI AND UNIPROT INFORMATION

|                           |                                                 |
