

Rat Afamin (AFM) ELISA Kit | AFM elisa kit

Rat Afamin (AFM) ELISA Kit

CATALOG #
AAA120931

REACTIVITY
Rat

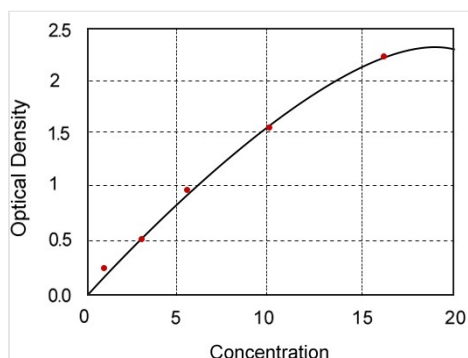

PRODUCT SYNONYMS

Afamin (AFM); Rat Afamin (AFM) ELISA Kit; AFM elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Rat
Samples	Serum, plasma, cell culture supernates, cell lysates, tissue homogenates
Assay Type	Quantitative Sandwich
Detection Range	1ng/ml - 300ng/ml
Sensitivity	0.42ng/ml
Intra-Assay	CV<8%
Inter-Assay	CV<10%
Preparation and Storage	Store at 2 to 8 degree C for 6 months.

ADDITIONAL INFORMATION

Related Product Information for AFM elisa kit

Intended Uses: This sandwich kit is for the accurate quantitative detection of Rat Afamin (also known as AFM) in serum, plasma, cell culture supernates, cell lysates, tissue homogenates.

Principles of the Assay: This kit is an Enzyme-Linked Immunosorbent Assay (ELISA). The plate has been pre-coated with Rat AFM antibody. AFM present in the sample is added and binds to antibodies coated on the wells. And then biotinylated Rat AFM Antibody is added and binds to AFM in the sample. Then Streptavidin-HRP is added and binds to the Biotinylated AFM antibody. After incubation unbound Streptavidin-HRP is washed away during a washing step. Substrate solution is then added and color develops in proportion to the amount of Rat AFM. The reaction is terminated by addition of acidic stop solution and absorbance is measured at 450 nm.

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
