

Rat Brain type Nitric Oxide synthase (bNOS) ELISA Kit | bNOS elisa kit

Rat Brain type Nitric Oxide synthase (bNOS) ELISA Kit

CATALOG #
AAA121077

REACTIVITY
Rat

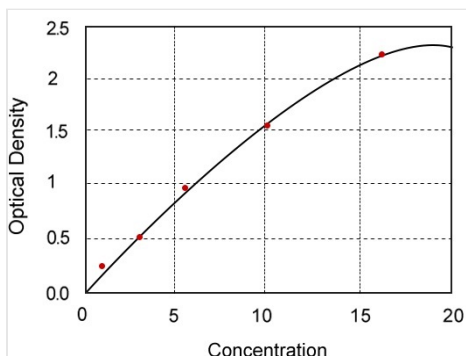

PRODUCT SYNONYMS

Brain type Nitric Oxide synthase (bNOS); Rat Brain type Nitric Oxide synthase (bNOS) ELISA Kit; bNOS elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Rat
Samples	Serum, plasma, cell culture supernates, cell lysates, tissue homogenates
Assay Type	Quantitative Sandwich
Detection Range	0.5ng/ml - 150ng/ml
Sensitivity	0.21ng/ml
Intra-Assay	CV<8%
Inter-Assay	CV<10%
Preparation and Storage	Store at 2 to 8 degree C for 6 months.

ADDITIONAL INFORMATION

Related Product Information for bNOS elisa kit

Intended Uses: This sandwich kit is for the accurate quantitative detection of Rat Brain Type Nitric Oxide Synthase (also known as bNOS) in serum, plasma, cell culture supernates, cell lysates, tissue homogenates.

Principles of the Assay: This kit is an Enzyme-Linked Immunosorbent Assay (ELISA). The plate has been pre-coated with Rat bNOS antibody. bNOS present in the sample is added and binds to antibodies coated on the wells. And then biotinylated Rat bNOS Antibody is added and binds to bNOS in the sample. Then Streptavidin-HRP is added and binds to the Biotinylated bNOS antibody. After incubation unbound Streptavidin-HRP is washed away during a washing step. Substrate solution is then added and color develops in proportion to the amount of Rat bNOS. The reaction is terminated by addition of acidic stop solution and absorbance is measured at 450 nm.

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
