

## Rat Spliced X-box-binding protein 1 (Xbp1s) ELISA Kit | Xbp1s elisa kit

Rat Spliced X-box-binding protein 1 (Xbp1s) ELISA Kit

CATALOG #  
**AAA121145**

REACTIVITY  
**Rat**

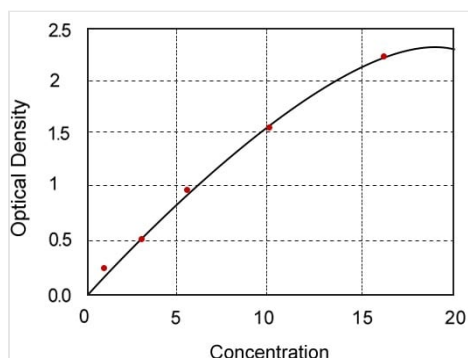

### PRODUCT SYNONYMS

Spliced X-box-binding protein 1 (Xbp1s); Rat Spliced X-box-binding protein 1 (Xbp1s) ELISA Kit; Xbp1s elisa kit

### PRODUCT SPECIFICATIONS

|                         |                                                                          |
|-------------------------|--------------------------------------------------------------------------|
| Reactivity              | Rat                                                                      |
| Samples                 | Serum, plasma, cell culture supernates, cell lysates, tissue homogenates |
| Assay Type              | Quantitative Sandwich                                                    |
| Detection Range         | 5ng/L - 1500ng/L                                                         |
| Sensitivity             | 2.53ng/L                                                                 |
| Intra-Assay             | CV<8%                                                                    |
| Inter-Assay             | CV<10%                                                                   |
| Preparation and Storage | Store at 2 to 8 degree C for 6 months.                                   |

### ADDITIONAL INFORMATION

#### Related Product Information for Xbp1s elisa kit

**Intended Uses:** This sandwich kit is for the accurate quantitative detection of Rat Spliced X-box-binding Protein 1 (also known as Xbp1s) in serum, plasma, cell culture supernates, cell lysates, tissue homogenates.

**Principles of the Assay:** This kit is an Enzyme-Linked Immunosorbent Assay (ELISA). The plate has been pre-coated with Rat Xbp1s antibody. Xbp1s present in the sample is added and binds to antibodies coated on the wells. And then biotinylated Rat Xbp1s Antibody is added and binds to Xbp1s in the sample. Then Streptavidin-HRP is added and binds to the Biotinylated Xbp1s antibody. After incubation unbound Streptavidin-HRP is washed away during a washing step. Substrate solution is then added and color develops in proportion to the amount of Rat Xbp1s. The reaction is terminated by addition of acidic stop solution and absorbance is measured at 450 nm.

**For Research Use Only.** Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
