

Monkey Luteinizing Hormone, LH ELISA Kit | LH elisa kit

Monkey Luteinizing Hormone, LH ELISA Kit

CATALOG #
AAA121935

REACTIVITY
Monkey

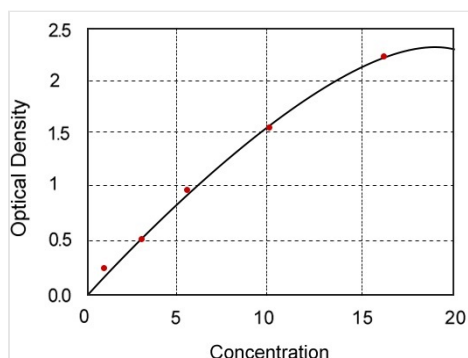

PRODUCT SYNONYMS

Luteinizing Hormone; LH; Monkey Luteinizing Hormone; LH ELISA Kit; LH elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Monkey
Samples	Serum, plasma, cell culture supernates, cell lysates, tissue homogenates
Assay Type	Quantitative Sandwich
Detection Range	0.05mIU/ml - 30mIU/ml
Sensitivity	0.027mIU/ml
Intra-Assay	CV<8%
Inter-Assay	CV<10%
Preparation and Storage	Store at 2 to 8 degree C for 6 months.

ADDITIONAL INFORMATION

Related Product Information for LH elisa kit

Intended Uses: This sandwich kit is for the accurate quantitative detection of Monkey Luteinizing Hormone (also known as LH) in serum, plasma, cell culture supernates, cell lysates, tissue homogenates.

Principles of the Assay: This kit is an Enzyme-Linked Immunosorbent Assay (ELISA). The plate has been pre-coated with Monkey LH antibody. LH present in the sample is added and binds to antibodies coated on the wells. And then biotinylated Monkey LH Antibody is added and binds to LH in the sample. Then Streptavidin-HRP is added and binds to the Biotinylated LH antibody. After incubation unbound Streptavidin-HRP is washed away during a washing step. Substrate solution is then added and color develops in proportion to the amount of Monkey LH. The reaction is terminated by addition of acidic stop solution and absorbance is measured at 450 nm.

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
