

Chicken Acetylcholinesterase, AChE ELISA Kit | AChE elisa kit

Chicken Acetylcholinesterase, AChE ELISA Kit

CATALOG #
AAA121939

REACTIVITY
Chicken

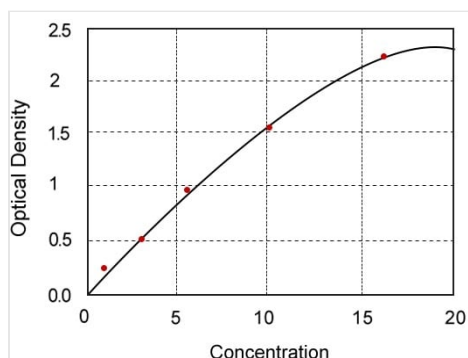

PRODUCT SYNONYMS

Acetylcholinesterase; AChE; Chicken Acetylcholinesterase; AChE ELISA Kit; AChE elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Chicken
Samples	Serum, plasma, cell culture supernates, cell lysates, tissue homogenates
Assay Type	Quantitative Sandwich
Detection Range	0.5ng/ml - 100ng/ml
Sensitivity	0.23ng/ml
Intra-Assay	CV<8%
Inter-Assay	CV<10%
Preparation and Storage	Store at 2 to 8 degree C for 6 months.

ADDITIONAL INFORMATION

Related Product Information for AChE elisa kit

Intended Uses: This sandwich kit is for the accurate quantitative detection of Chicken Acetylcholinesterase (also known as AChE) in serum, plasma, cell culture supernates, cell lysates, tissue homogenates.

Principles of the Assay: This kit is an Enzyme-Linked Immunosorbent Assay (ELISA). The plate has been pre-coated with Chicken AChE antibody. AChE present in the sample is added and binds to antibodies coated on the wells. And then biotinylated Chicken AChE Antibody is added and binds to AChE in the sample. Then Streptavidin-HRP is added and binds to the Biotinylated AChE antibody. After incubation unbound Streptavidin-HRP is washed away during a washing step. Substrate solution is then added and color develops in proportion to the amount of Chicken AChE. The reaction is terminated by addition of acidic stop solution and absorbance is measured at 450 nm.

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
