

Sheep prostaglandin E2 (PGE2) ELISA Kit | PGE2 elisa kit

Sheep prostaglandin E2 (PGE2) ELISA Kit

CATALOG #
AAA122129

REACTIVITY
Sheep

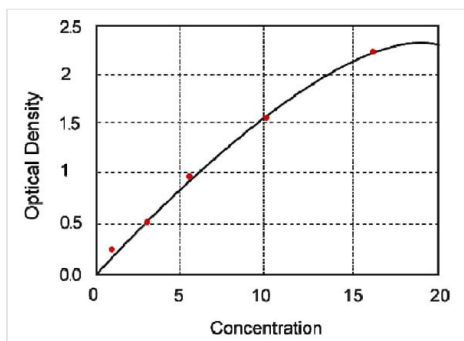

PRODUCT SYNONYMS

prostaglandin E2 (PGE2); Sheep prostaglandin E2 (PGE2) ELISA Kit; PGE2 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Sheep
Assay Type	Quantitative Sandwich
Samples	Serum, plasma, cell culture supernates, Ascites, tissue homogenates or other biological fluids
Detection Range	5-1000ng/L
Sensitivity	2.53ng/L
Intra-assay Precision	Intra-Assay Precision (Precision within an assay) Three samples of known concentration were tested on one plate to assess intra-assay precision. Intra-Assay: CV<8%
Inter-assay Precision	Inter-Assay Precision (Precision between assays) Three samples of known concentration were tested in separate assays to assess inter-assay precision. CV(%) = SD/mean x 100. Inter-Assay: CV<10%
Preparation and Storage	Store at 2 to 8 degree C for 6 months.

ADDITIONAL INFORMATION

Related Product Information for PGE2 elisa kit

Principle of the Assay: This kit is an Enzyme-Linked Immunosorbent Assay (ELISA). The plate has been pre-coated with Sheep PGE2 antibody. PGE2 present in the sample is added and binds to antibodies coated on the wells. And then biotinylated Sheep PGE2 Antibody is added and binds to PGE2 in the sample. Then Streptavidin-HRP is added and binds to the Biotinylated PGE2 antibody. After incubation unbound Streptavidin-HRP is washed away during a washing step. Substrate solution is then added and color develops in proportion to the amount of Sheep PGE2. The reaction is terminated by addition of acidic stop solution and absorbance is measured at 450 nm.

Intended Uses: This sandwich kit is for the accurate quantitative detection of Sheep prostaglandin E2 (also known as PGE2) in serum, plasma, cell culture supernates, Ascites, tissue homogenates or other biological fluids.

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
