

Canine Fibronectin, FN ELISA Kit | FN elisa kit

Canine Fibronectin, FN ELISA Kit

CATALOG #
AAA122656

REACTIVITY
Canine

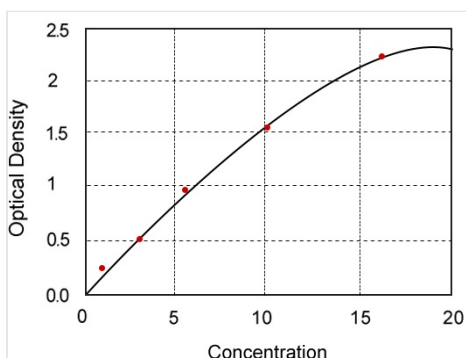

PRODUCT SYNONYMS

Fibronectin; FN; Canine Fibronectin; FN ELISA Kit; FN elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Canine
Samples	Serum, plasma, cell culture supernates, cell lysates, tissue homogenates
Assay Type	Quantitative Sandwich
Detection Range	1mg/L - 400mg/L
Sensitivity	0.51mg/L
Intra-Assay	CV<8%
Inter-Assay	CV<10%
Preparation and Storage	Store at 2 to 8 degree C for 6 months.

ADDITIONAL INFORMATION

Related Product Information for FN elisa kit

Intended Uses: This sandwich kit is for the accurate quantitative detection of Canine Fibronectin (also known as FN) in serum, plasma, cell culture supernates, cell lysates, tissue homogenates.

Principles of the Assay: This kit is an Enzyme-Linked Immunosorbent Assay (ELISA). The plate has been pre-coated with Canine FN antibody. FN present in the sample is added and binds to antibodies coated on the wells. And then biotinylated Canine FN Antibody is added and binds to FN in the sample. Then Streptavidin-HRP is added and binds to the Biotinylated FN antibody. After incubation unbound Streptavidin-HRP is washed away during a washing step. Substrate solution is then added and color develops in proportion to the amount of Canine FN. The reaction is terminated by addition of acidic stop solution and absorbance is measured at 450 nm.

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
