Intended Uses: This sandwich kit is for the accurate quantitative detection of Bovine C-C motif chemokine 5 (also known as CCL5) in serum, plasma, cell culture supernates, Ascites, tissue homogenates or other biological fluids.

Principle of the Assay: This kit is an Enzyme-Linked Immunosorbent Assay (ELISA). The plate has been pre-coated with Bovine CCL5 antibody. CCL5 present in the sample is added and binds to antibodies coated on the wells. And then biotinylated Bovine CCL5 Antibody is added and binds to CCL5 in the sample. Then Streptavidin-HRP is added and binds to the Biotinylated CCL5 antibody. After incubation unbound Streptavidin-HRP is washed away during a washing step. Substrate solution is then added and color develops in proportion to the amount of Bovine CCL5. The reaction is terminated by addition of acidic stop solution and absorbance is measured at 450 nm.
