

## Mouse Integrin alpha V beta3 (ITG alpha V beta3) ELISA Kit | ITG alpha V beta3 elisa kit

Mouse Integrin alpha V beta3 (ITG alpha V beta3) ELISA Kit

CATALOG #  
**AAA12399**

REACTIVITY  
**Mouse**

### PRODUCT SYNONYMS

Integrin alpha V beta3 (ITG alpha V beta3); Mouse Integrin alpha V beta3 (ITG alpha V beta3) ELISA Kit; Mouse Integrin a V b3 (ITG a V b3) ELISA Kit; ITG alpha V beta3 elisa kit

### PRODUCT SPECIFICATIONS

|                         |                                       |
|-------------------------|---------------------------------------|
| Reactivity              | Mouse                                 |
| Specificity             | No cross-reaction with other factors. |
| Sequence Length         | 1046                                  |
| Assay Type              | Sandwich                              |
| Detection Range         | 10 ng/mL-0.156 ng/mL                  |
| Sensitivity             | Up to 0.05 ng/mL                      |
| Intra-assay Precision   | <= 8%                                 |
| Inter-assay Precision   | <= 12%                                |
| Preparation and Storage | Store all reagents at 2-8 degree C.   |

### ADDITIONAL INFORMATION

#### Related Product Information for ITG alpha V beta3 elisa kit

Principle of the Assay: As mentioned above, this kit utilizes the Double Antibody Sandwich ELISA technique. The pre-coated antibody is an anti-Mouse ITG alphaVbeta3 monoclonal antibody, while the detection antibody is a biotinylated polyclonal antibody. Samples and biotinylated antibodies are added into ELISA plate wells and washed out with PBS or TBS after their respective additions to the wells. Then Avidin-peroxidase conjugates are added to the wells in after. TMB substrate is used for coloration after the enzyme conjugate has already been thoroughly washed out of the wells by PBS or TBS. TMB reacts to form a blue product from the peroxidase activity, and finally turns to yellow after addition of the stop solution (Color Reagent C). The color intensity and quantity of target analyte in the sample are positively correlated.
