

TGF Alpha ELISA Kit | TGFA elisa kit

Rabbit TGF Alpha PicoKine ELISA Kit

CATALOG # AAA124790	REACTIVITY Rabbit There is cross-reactivity with TGF beta 2, TGF beta 3, TGF beta 5	APPLICATIONS ELISA
-------------------------------	---	------------------------------

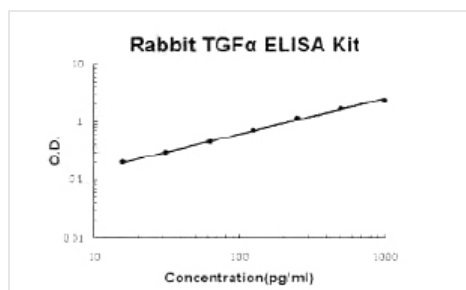

PRODUCT SYNONYMS

TGF Alpha; Rabbit TGF Alpha PicoKine ELISA Kit; Protransforming growth factor alpha; Transforming growth factor alpha; TGF-alpha; EGF-like TGF; ETGF; TGF type 1; TGFA; TGFA elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Rabbit There is cross-reactivity with TGF beta 2, TGF beta 3, TGF beta 5<1%.
Specificity	Natural and recombinant Rabbit Rabbit TGF Alpha
Sequence Length	162
Assay Type	Quantitative Sandwich
Detection Range	15.6pg/ml-1000pg/ml
Sensitivity	<1pg/ml
Applicable Applications for TGFA elisa kit	ELISA
Intra-assay Precision	Intra-Assay Precision (Precision within an assay) Three samples of known concentration weretested on one plate to assess intra-assay precision
Inter-assay Precision	Inter-Assay Precision (Precision between assays) Three samples of known concentration weretested in separate assays to assess inter-assay precision.
Preparation and Storage	Store at 4 degree C for 6 months, at -20 degree C for 12 months. Avoid multiple freeze-thaw cycles.

ADDITIONAL INFORMATION

Related Product Information for TGFA elisa kit	Principle of the Assay: Rabbit Rabbit TGF Alpha ELISA Kit was based on standard sandwich enzyme-linked immune- sorbent assay technology. A monoclonal antibody from mouse specific for Rabbit TGF Alpha has been precoated onto 96-well plates. Standards(Expression system for standard: E.coli,V40-A89) and test samples are added to the wells, a biotinylated detection polyclonal antibody from goat specific for Rabbit TGF Alpha is added subsequently and then followed by washing with PBS or TBS buffer. Avidin-Biotin-Peroxidase Complex was added and unbound conjugates were washed away with PBS or TBS buffer. HRP substrate TMB was used to visualize HRP enzymatic reaction. TMB was catalyzed by HRP to produce a blue color product that changed into yellow after adding acidic stop solution. The density of yellow is proportional to the Rabbit Rabbit TGF Alpha amount of sample captured in plate. Background: Transforming growth factor alpha(TGF-alpha) is upregulated in some rabbit cancers. It is produced in macrophages, brain cells, and keratinocytes, and induces epithelial development. It is closely related to EGF, and can also bind to the EGF receptor with similar effects. TGFalpha stimulates neural cell proliferation in the adult injured brain. Transforming growth factor alpha gene(TGFA) maps to rabbit chromosome 2 close to the breakpoint of the t(2;8) variant translocation in Burkitt lymphoma. Synthetic TGF-alpha was as active as murine epidermal growth factor in binding to the epidermal growth factor receptor and in stimulation of anchorage-dependent and of anchorage-independent growth of normal indicator cells in culture. Synthetic TGF-alpha stimulated plasminogen activator production in A 431 and HeLa cells; the stimulation was similar to that induced by epidermal growth factor. Furthermore, synthetic rabbit TGF-alpha showed similar immunoreactivity when compared with rabbit TGF-alpha. Thus, the 50-amino acid TGF-alpha is likely to be the bioactive principle produced and secreted by tumor cell lines.
Product Categories/Family for TGFA elisa kit	Cardiovascular; Angiogenesis; Growth Factors; TGF; Signal Transduction; Growth Factors/Hormones; Cancer; Invasion/Microenvironment; Angiogenic Growth Factors

NCBI AND UNIPROT INFORMATION

NCBI GI #	153791414
