

TGF Beta 1 ELISA Kit | TGFB1 elisa kit

Monkey primate TGF Beta 1 PicoKine ELISA Kit

CATALOG # AAA124794	REACTIVITY Monkey There is cross-reactivity with TGF beta 2, TGF beta 3, TGF beta 5	APPLICATIONS ELISA
-------------------------------	---	------------------------------

PRODUCT SYNONYMS

TGF Beta 1; Monkey primate TGF Beta 1 PicoKine ELISA Kit; Transforming growth factor beta-1; TGF-beta-1; Latency-associated peptide; LAP; TGFB1; TGFB; TGFB1 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Monkey There is cross-reactivity with TGF beta 2, TGF beta 3, TGF beta 5<1%.
Specificity	Natural and recombinant 215 Monkey primate TGF Beta 1
Sequence Length	390
Assay Type	Quantitative Sandwich
Detection Range	15.6pg/ml-1000pg/ml
Sensitivity	<1pg/ml
Applicable Applications for TGFB1 elisa kit	ELISA
Intra-assay Precision	Intra-Assay Precision (Precision within an assay) Three samples of known concentration were tested on one plate to assess intra-assay precision
Inter-assay Precision	Inter-Assay Precision (Precision between assays) Three samples of known concentration were tested in separate assays to assess inter-assay precision.
Preparation and Storage	Store at 4 degree C for 6 months, at -20 degree C for 12 months. Avoid multiple freeze-thaw cycles.

ADDITIONAL INFORMATION

Related Product Information for TGFB1 elisa kit	Principle of the Assay: 215 Monkey primate TGF Beta 1 ELISA Kit was based on standard sandwich enzyme-linked immunosorbent assay technology. A monoclonal antibody from mouse specific for Monkey primate TGF Beta 1 has been precoated onto 96-well plates. Standards(Expression system for standard: CHO; Immunogen sequence: A279-S390) and test samples are added to the wells, a biotinylated detection polyclonal antibody from goat specific for Monkey primate TGF Beta 1 is added subsequently and then followed by washing with PBS or TBS buffer. Avidin-Biotin-Peroxidase Complex was added and unbound conjugates were washed away with PBS or TBS buffer. HRP substrate TMB was used to visualize HRP enzymatic reaction. TMB was catalyzed by HRP to produce a blue color product that changed into yellow after adding acidic stop solution. The density of yellow is proportional to the 215 Monkey primate TGF Beta 1 amount of sample captured in plate. Background: Transforming growth factor-beta1(TGF-beta1) is a multifunctional peptide that controls proliferation, differentiation, and other functions in many cell types. Many cells synthesize TGF-beta and essentially all of them have specific receptors for this peptide. TGF-beta regulates the actions of many other peptide growth factors and determines a positive or negative direction of their effects.TGFBeta1 is known for its potent and diverse biological effects, including immune regulation, and cell growth and differentiation.TGFBeta1 is also an important mediator of bone remodeling.TGFBeta1, a potent keratinocyte growth inhibitor, has been shown to be overexpressed in keratinocytes in certain inflammatory skin diseases and has been thought to counteract the effects of other growth factors at the site of inflammation.TGF-beta1, a multifunctional cytokine with fibrogenic properties, has been implicated in the pathogenesis of the vascular and target organ complications of hypertension. TGF-beta1 may also regulate blood pressure via stimulation of endothelin-1 and/or renin secretion. TGFBeta1 is secreted as a latent form, which consists of its mature form and a latency-associated peptide(beta1-LAP) in either the presence or the absence of additional latent TGF-beta1-binding protein. The standard product used in this kit is recombinant TGFBeta1 with the molecular mass of 25KDa.
Product Categories/Family for TGFB1 elisa kit	Cardiovascular; Angiogenesis; Growth Factors; TGF; Signal Transduction; Growth Factors/Hormones; Stem Cells; Signaling Pathways; TGF Beta; Secreted; Cancer; Invasion/Microenvironment; Angiogenic Growth Factors; Developmental Biology; Organogenesis; Angiog

NCBI AND UNIPROT INFORMATION

NCBI GI #	63025222
NCBI GeneID	7040
NCBI Accession #	NP_000651.3
NCBI GenBank Nucleotide #	NM_000660.6
UniProt Accession #	P01137; Q9UCG4; A8K792
Molecular Weight	44341 MW
NCBI Official Full Name	transforming growth factor beta-1 preproprotein
NCBI Official Synonym Full Names	transforming growth factor beta 1
NCBI Official Symbol	TGFB1
NCBI Official Synonym Symbols	CED; LAP; DPD1; TGFB; TGFbeta
NCBI Protein Information	transforming growth factor beta-1
UniProt Protein Name	Transforming growth factor beta-1
UniProt Gene Name	TGFB1
UniProt Synonym Gene Names	TGFB; TGF-beta-1; LAP

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
