

General Triiodothyronine (T3) ELISA Kit | T3 elisa kit

General Triiodothyronine (T3) ELISA Kit

CATALOG #
AAA129735

REACTIVITY
General

PRODUCT SYNONYMS

Triiodothyronine (T3); General Triiodothyronine (T3) ELISA Kit; 3; 3'; 5-Triiodo-L-Thyronine; Liothyronine; Cytomel; Tertroxin; T3 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	General
Specificity	This assay has high sensitivity and excellent specificity for detection of T3. No significant cross-reactivity or interference between T3 and analogues was observed.
Assay Type	Quantitative Competitive
Samples	Serum, plasma and other biological fluids
Detection Range	123.5-10,000pg/mL
Sensitivity	< 50.5pg/mL
Intra-assay Precision	Intra-assay Precision (Precision within an assay): 3 samples with low, middle and high level T3 were tested 20 times on one plate, respectively. Intra-Assay: CV<10%
Inter-assay Precision	Inter-assay Precision (Precision between assays): 3 samples with low, middle and high level T3 were tested on 3 different plates, 8 replicates in each plate. CV(%) = SD/meanX100. Inter-Assay: CV<12%
Preparation and Storage	The stability of kit is determined by the loss rate of activity. The loss rate of this kit is less than 5% within the expiration date under appropriate storage condition. To minimize extra influence on the performance, operation procedures and lab conditions, especially room temperature, air humidity, incubator temperature should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same operator from the beginning to the end.

ADDITIONAL INFORMATION

Related Product Information for T3 elisa kit	Principle of the Assay: This assay employs the competitive inhibition enzyme immunoassay technique. A monoclonal antibody specific to T3 has been pre-coated onto a microplate. A competitive inhibition reaction is launched between biotin labeled T3 and unlabeled T3 (Standards or samples) with the pre-coated antibody specific to T3. After incubation the unbound conjugate is washed off. Next, avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. The amount of bound HRP conjugate is reverse proportional to the concentration of T3 in the sample. After addition of the substrate solution, the intensity of color developed is reverse proportional to the concentration of T3 in the sample. Intended Uses: The kit is a competitive inhibition enzyme immunoassay technique for the in vitro quantitative measurement of T3 in serum, plasma and other biological fluids.
Product Categories/Family for T3 elisa kit	Endocrinology; Autoimmunity

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
