

## Mouse Transforming Growth Factor Beta 3 (TGFb3) CLIA Kit | TGFb3 clia kit

Mouse Transforming Growth Factor Beta 3 (TGFb3) CLIA Kit

CATALOG #  
**AAA130180**

REACTIVITY  
**Mouse**

### PRODUCT SYNONYMS

Transforming Growth Factor Beta 3 (TGFb3); Mouse Transforming Growth Factor Beta 3 (TGFb3) CLIA Kit; TGF-B3; LAP; Latency-associated peptide; TGFb3 clia kit

| Detection Range                                   | 1.37-1,000pg/mL                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
| Sensitivity                                       | 0.57pg/mL                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| Application                                       | Chemiluminescent immunoassay for Antigen Detection.                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| Intra-assay Precision (Precision within an assay) | 3 samples with low, middle and high level Transforming Growth Factor Beta 3 (TGFb3) were tested 20 times on one plate, respectively.                                                                                                                                                                                                                                                                                                                                                       |
| Inter-assay Precision (Precision between assays)  | 3 samples with low, middle and high level Transforming Growth Factor Beta 3 (TGFb3) were tested on 3 different plates, 8 replicates in each plate.                                                                                                                                                                                                                                                                                                                                         |
| CV(%) =                                           | SD/meanX100                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
| Intra-Assay                                       | CV<10%                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
| Inter-Assay                                       | CV<12%                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
| Preparation and Storage                           | The stability of kit is determined by the loss rate of activity. The loss rate of this kit is less than 5% within the expiration date under appropriate storage condition.<br>To minimize extra influence on the performance, operation procedures and lab conditions, especially room temperature, air humidity, incubator temperature should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same operator from the beginning to the end. |

| Related Product Information for TGFb3 clia kit | The microplate provided in this kit has been pre-coated with an antibody specific to Transforming Growth Factor Beta 3 (TGFb3). Standards or samples are then added to the appropriate microplate wells with a biotin-conjugated antibody specific to Transforming Growth Factor Beta 3 (TGFb3). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. Then the mixture of substrate A and B is added to generate glow light emission kinetics. Upon plate development, the intensity of the emitted light is proportional to the Transforming Growth Factor Beta 3 (TGFb3) level in the sample or standard.; |
| Product Categories/Family for TGFb3 clia kit   | Cytokine; Tumor immunity; Infection immunity                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
