Human Laminin (LN) CLIA Kit

CATALOG #
AAA130589

REACTIVITY
Human

PRODUCT SYNONYMS

Laminin (LN); Human Laminin (LN) CLIA Kit; LAM; LN clia kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Specificity	This assay has high sensitivity and excellent specificity for detection of Laminin (LN). No significant cross-reactivity or interference between Laminin (LN) and analogues was observed.
Sequence Length	1193
Assay Type	Double-antibody Sandwich
Samples	Serum, Plasma and other biological fluids
Detection Range	6.9-5,000pg/mL
Sensitivity	2.8pg/mL
Application	Chemiluminescent immunoassay for Antigen Detection.
Intra-assay Precision (Precision within an assay)	3 samples with low, middle and high level Laminin (LN) were tested 20 times on one plate, respectively.
Inter-assay Precision (Precision between assays)	3 samples with low, middle and high level Laminin (LN) were tested on 3 different plates, 8 replicates in each plate.
CV(%) =	SD/meanX100
Intra-Assay	CV<10%
Inter-Assay	CV<12%
Preparation and Storage	The stability of kit is determined by the loss rate of activity. The loss rate of this kit is less than 5% within the expiration date under appropriate storage condition. To minimize extra influence on the performance, operation procedures and lab conditions, especially room temperature, air humidity, incubator temperature should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same operator from the beginning to the end.

ADDITIONAL INFORMATION

Related Product Information for LN clia kit	The microplate provided in this kit has been pre-coated with an antibody specific to Laminin (LN). Standards or samples are then added to the appropriate microplate wells with a biotin-conjugated antibody specific to Laminin (LN). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. Then the mixture of substrate A and B is added to generate glow light emission kinetics. Upon plate development, the intensity of the emitted light is proportional to the Laminin (LN) level in the sample or standard.;
