

Rabbit anti-General Homovanillic Acid (HVA) Polyclonal Antibody | anti-HVA antibody

Polyclonal Antibody to Homovanillic Acid (HVA)

CATALOG #	HOST	REACTIVITY	APPLICATIONS
AAA135010	Rabbit	General	Immunoprecipitation, Immunocytochemistry, Immunohistochemistry

PRODUCT SYNONYMS

Homovanillic Acid (HVA); Polyclonal Antibody; Polyclonal Antibody to Homovanillic Acid (HVA); anti-HVA antibody

PRODUCT SPECIFICATIONS

Host	Rabbit
Reactivity	General
Clonality	Polyclonal
Purity/Purification	Antigen-specific affinity chromatography followed by Protein A affinity chromatography
Form/Format	Supplied as solution form in 0.01M PBS, pH7.4, containing 0.05% Proclin-300, 50% glycerol.
Concentration	1mg/ml (varies by lot)
Applicable Applications for anti-HVA antibody	IP (Immunoprecipitation), ICC (Immunocytochemistry), IHC (Immunohistochemistry)
Organism Species	Pan-species (General)
Source	Polyclonal antibody preparation
Traits	Liquid
Immunogen	Small Molecule, HVA conjugated to BSA.
Cross Reactivity	General
Conjugated Antibody	The APC conjugated antibody version of this item is also available as
Preparation and Storage	Storage: Avoid repeated freeze/thaw cycles. Store at 4°C for frequent use. Aliquot and store at -20°C for 12 months. Stability Test: The thermal stability is described by the loss rate. The loss rate was determined by accelerated thermal degradation test, that is, incubate the protein at 37°C for 48h, and no obvious degradation and precipitation were observed. The loss rate is less than 5% within the expiration date under appropriate storage condition.

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
