

Mouse Cyclophilin A (CYPA) ELISA Kit | CYPA elisa kit

Mouse Cyclophilin A (CYPA) ELISA Kit

CATALOG #
AAA136177

REACTIVITY
Mouse

PRODUCT SYNONYMS

Cyclophilin A (CYPA); Mouse Cyclophilin A (CYPA) ELISA Kit; PPIA; CyP-A; CYPH; Peptidylprolyl Isomerase A; Peptidyl-Prolyl Isomerase A; Peptidyl-prolyl cis-trans isomerase A; Cyclosporin A-binding protein; CYPA elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Mouse
Specificity	This assay has high sensitivity and excellent specificity for detection of Cyclophilin A (CYPA). No significant cross-reactivity or interference between Cyclophilin A (CYPA) and analogues was observed.
Sequence Length	164
Assay Type	Double-antibody Sandwich
Samples	Serum, Plasma, Tissue homogenates, Cell lysates, Cell culture supernates and other biological fluids
Detection Range	1.56-100ng/mL
Sensitivity	0.64ng/mL
Application	Enzyme-linked immunosorbent assay for Antigen Detection.
Intra-assay Precision (Precision within an assay)	3 samples with low, middle and high level Cyclophilin A (CYPA) were tested 20 times on one plate, respectively.
Inter-assay Precision (Precision between assays)	3 samples with low, middle and high level Cyclophilin A (CYPA) were tested on 3 different plates, 8 replicates in each plate.
CV(%) =	SD/meanX100
Intra-Assay	CV<10%
Inter-Assay	CV<12%
Preparation and Storage	The stability of kit is determined by the loss rate of activity. The loss rate of this kit is less than 5% within the expiration date under appropriate storage condition. To minimize extra influence on the performance, operation procedures and lab conditions, especially room temperature, air humidity, incubator temperature should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same operator from the beginning to the end.

ADDITIONAL INFORMATION

Related Product Information for CYPA elisa kit	The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Cyclophilin A (CYPA). Standards or samples are then added to the appropriate microtiter plate wells with a biotin-conjugated antibody specific to Cyclophilin A (CYPA). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Cyclophilin A (CYPA), biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm ± 10nm. The concentration of Cyclophilin A (CYPA) in the samples is then determined by comparing the O.D. of the samples to the standard curve.
Product Categories/Family for CYPA elisa kit	Tumor immunity; Infection immunity

NCBI AND UNIPROT INFORMATION

NCBI GI #	318264336
NCBI GeneID	100304996
NCBI Accession #	NP_001187167.1
NCBI GenBank Nucleotide #	NM_001200238.1
NCBI Official Full Name	cyclophilin A
NCBI Official Symbol	LOC100304996
NCBI Protein Information	cyclophilin A

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
