

Human LIM Domain Binding Protein 1 (LDB1) ELISA Kit | LDB1 elisa kit

Human LIM Domain Binding Protein 1 (LDB1) ELISA Kit

CATALOG #
AAA136683

REACTIVITY
Human

PRODUCT SYNONYMS

LIM Domain Binding Protein 1 (LDB1); Human LIM Domain Binding Protein 1 (LDB1) ELISA Kit; CLIM2; NLI; Carboxy Terminal LIM Domain Protein 2; LIM domain-binding factor CLIM2; Nuclear LIM interactor; LDB1 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Specificity	This assay has high sensitivity and excellent specificity for detection of LIM Domain Binding Protein 1 (LDB1). No significant cross-reactivity or interference between LIM Domain Binding Protein 1 (LDB1) and analogues was observed.
Sequence Length	411
Assay Type	Double-antibody Sandwich
Samples	Tissue homogenates and other biological fluids
Detection Range	0.156-10ng/mL
Sensitivity	0.061ng/mL
Application	Enzyme-linked immunosorbent assay for Antigen Detection.
Intra-assay Precision (Precision within an assay)	3 samples with low, middle and high level LIM Domain Binding Protein 1 (LDB1) were tested 20 times on one plate, respectively.
Inter-assay Precision (Precision between assays)	3 samples with low, middle and high level LIM Domain Binding Protein 1 (LDB1) were tested on 3 different plates, 8 replicates in each plate.
CV(%) =	SD/meanX100
Intra-Assay	CV<10%
Inter-Assay	CV<12%
Preparation and Storage	The stability of kit is determined by the loss rate of activity. The loss rate of this kit is less than 5% within the expiration date under appropriate storage condition. To minimize extra influence on the performance, operation procedures and lab conditions, especially room temperature, air humidity, incubator temperature should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same operator from the beginning to the end.

ADDITIONAL INFORMATION

Related Product Information for LDB1 elisa kit	The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to LIM Domain Binding Protein 1 (LDB1). Standards or samples are then added to the appropriate microtiter plate wells with a biotin-conjugated antibody specific to LIM Domain Binding Protein 1 (LDB1). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain LIM Domain Binding Protein 1 (LDB1), biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm ± 10nm. The concentration of LIM Domain Binding Protein 1 (LDB1) in the samples is then determined by comparing the O.D. of the samples to the standard curve.

NCBI AND UNIPROT INFORMATION

NCBI GI #	164663816
NCBI GeneID	8861
NCBI Accession #	NP_001106878.1
NCBI GenBank Nucleotide #	NM_001113407.1
UniProt Accession #	Q86U70; O75479; O96010; Q1EQX1; Q9UGM4; B4DUC4
Molecular Weight	42,809 Da
NCBI Official Full Name	LIM domain-binding protein 1 isoform 1
NCBI Official Synonym Full Names	LIM domain binding 1
NCBI Official Symbol	LDB1
NCBI Official Synonym Symbols	NLI; CLIM2
NCBI Protein Information	LIM domain-binding protein 1
UniProt Protein Name	LIM domain-binding protein 1
UniProt Gene Name	LDB1
UniProt Synonym Gene Names	CLIM2; LDB-1; CLIM-2; hLdb1
UniProt Entry Name	LDB1_HUMAN

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
