

Human Sarcolipin (SLN) ELISA Kit | SLN elisa kit

Human Sarcolipin (SLN) ELISA Kit

CATALOG #
AAA137228

REACTIVITY
Human

PRODUCT SYNONYMS

Sarcolipin (SLN); Human Sarcolipin (SLN) ELISA Kit; SLN elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Specificity	This assay has high sensitivity and excellent specificity for detection of Sarcolipin (SLN). No significant cross-reactivity or interference between Sarcolipin (SLN) and analogues was observed.
Sequence Length	31
Assay Type	Double-antibody Sandwich
Samples	Tissue homogenates, Cell lysates and other biological fluids
Detection Range	0.312-20ng/mL
Sensitivity	0.112ng/mL
Application	Enzyme-linked immunosorbent assay for Antigen Detection.
Intra-assay Precision (Precision within an assay)	3 samples with low, middle and high level Sarcolipin (SLN) were tested 20 times on one plate, respectively.
Inter-assay Precision (Precision between assays)	3 samples with low, middle and high level Sarcolipin (SLN) were tested on 3 different plates, 8 replicates in each plate.
CV(%) =	SD/meanX100
Intra-Assay	CV<10%
Inter-Assay	CV<12%
Preparation and Storage	The stability of kit is determined by the loss rate of activity. The loss rate of this kit is less than 5% within the expiration date under appropriate storage condition. To minimize extra influence on the performance, operation procedures and lab conditions, especially room temperature, air humidity, incubator temperature should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same operator from the beginning to the end.

ADDITIONAL INFORMATION

Related Product Information for SLN elisa kit	The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Sarcolipin (SLN). Standards or samples are then added to the appropriate microtiter plate wells with a biotin-conjugated antibody specific to Sarcolipin (SLN). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Sarcolipin (SLN), biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm ± 10nm. The concentration of Sarcolipin (SLN) in the samples is then determined by comparing the O.D. of the samples to the standard curve.
Product Categories/Family for SLN elisa kit	Signal Transduction

NCBI AND UNIPROT INFORMATION

NCBI GI #	4507063
NCBI GeneID	6588
NCBI Accession #	NP_003054.1
NCBI GenBank Nucleotide #	NM_003063.2
UniProt Accession #	O00631; Q6ICV3
Molecular Weight	3,762 Da
NCBI Official Full Name	sarcolipin
NCBI Official Synonym Full Names	sarcolipin
NCBI Official Symbol	SLN
NCBI Protein Information	sarcolipin
UniProt Protein Name	Sarcolipin
UniProt Gene Name	SLN
UniProt Entry Name	SARCO_HUMAN

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
