

Human Chymotrypsinogen B1 (CTRB1) ELISA Kit | CTRB1 elisa kit

Human Chymotrypsinogen B1 (CTRB1) ELISA Kit

CATALOG #
AAA139651

REACTIVITY
Human

PRODUCT SYNONYMS

Chymotrypsinogen B1 (CTRB1); Human Chymotrypsinogen B1 (CTRB1) ELISA Kit; CTRB1 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Specificity	This assay has high sensitivity and excellent specificity for detection of Chymotrypsinogen B1 (CTRB1). No significant cross-reactivity or interference between Chymotrypsinogen B1 (CTRB1) and analogues was observed.
Sequence Length	263
Assay Type	Double-antibody Sandwich
Samples	Tissue homogenates, Cell lysates and other biological fluids
Detection Range	1.56-100ng/mL
Sensitivity	0.61ng/mL
Application	Enzyme-linked immunosorbent assay for Antigen Detection.
Intra-assay Precision (Precision within an assay)	3 samples with low, middle and high level Chymotrypsinogen B1 (CTRB1) were tested 20 times on one plate, respectively.
Inter-assay Precision (Precision between assays)	3 samples with low, middle and high level Chymotrypsinogen B1 (CTRB1) were tested on 3 different plates, 8 replicates in each plate.
CV(%) =	SD/meanX100
Intra-Assay	CV<10%
Inter-Assay	CV<12%
Preparation and Storage	The stability of kit is determined by the loss rate of activity. The loss rate of this kit is less than 5% within the expiration date under appropriate storage condition. To minimize extra influence on the performance, operation procedures and lab conditions, especially room temperature, air humidity, incubator temperature should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same operator from the beginning to the end.

ADDITIONAL INFORMATION

Related Product Information for CTRB1 elisa kit	The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Chymotrypsinogen B1 (CTRB1). Standards or samples are then added to the appropriate microtiter plate wells with a biotin-conjugated antibody specific to Chymotrypsinogen B1 (CTRB1). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Chymotrypsinogen B1 (CTRB1), biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm ± 10nm. The concentration of Chymotrypsinogen B1 (CTRB1) in the samples is then determined by comparing the O.D. of the samples to the standard curve.
Product Categories/Family for CTRB1 elisa kit	Enzyme & Kinase

NCBI AND UNIPROT INFORMATION

NCBI GI #	119616066
NCBI GeneID	1504
UniProt Accession #	P17538
Molecular Weight	27,870 Da
NCBI Official Full Name	chymotrypsinogen B1
NCBI Official Synonym Full Names	chymotrypsinogen B1
NCBI Official Symbol	CTRB1
NCBI Official Synonym Symbols	CTRB
NCBI Protein Information	chymotrypsinogen B
UniProt Protein Name	Chymotrypsinogen B
UniProt Gene Name	CTRB1
UniProt Synonym Gene Names	CTRB
UniProt Entry Name	CTRB1_HUMAN

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
