

Rat Amnionless (AMN) ELISA Kit | AMN elisa kit

Rat Amnionless (AMN) ELISA Kit

CATALOG #
AAA140603

REACTIVITY
Rat

PRODUCT SYNONYMS

Amnionless (AMN); Rat Amnionless (AMN) ELISA Kit; AMN elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Rat
Specificity	This assay has high sensitivity and excellent specificity for detection of Amnionless (AMN). No significant cross-reactivity or interference between Amnionless (AMN) and analogues was observed.
Sequence Length	453
Assay Type	Double-antibody Sandwich
Samples	Tissue homogenates, Cell lysates and other biological fluids
Detection Range	0.625-40ng/mL
Sensitivity	0.214ng/mL
Application	Enzyme-linked immunosorbent assay for Antigen Detection.
Intra-assay Precision (Precision within an assay)	3 samples with low, middle and high level Amnionless (AMN) were tested 20 times on one plate, respectively.
Inter-assay Precision (Precision between assays)	3 samples with low, middle and high level Amnionless (AMN) were tested on 3 different plates, 8 replicates in each plate.
CV(%) =	SD/meanX100
Intra-Assay	CV<10%
Inter-Assay	CV<12%
Preparation and Storage	The stability of kit is determined by the loss rate of activity. The loss rate of this kit is less than 5% within the expiration date under appropriate storage condition. To minimize extra influence on the performance, operation procedures and lab conditions, especially room temperature, air humidity, incubator temperature should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same operator from the beginning to the end.

ADDITIONAL INFORMATION

Related Product Information for AMN elisa kit	The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Amnionless (AMN). Standards or samples are then added to the appropriate microtiter plate wells with a biotin-conjugated antibody specific to Amnionless (AMN). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Amnionless (AMN), biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm ± 10nm. The concentration of Amnionless (AMN) in the samples is then determined by comparing the O.D. of the samples to the standard curve.
Product Categories/Family for AMN elisa kit	Reproductive science; Developmental science; Gastroenterology

NCBI AND UNIPROT INFORMATION

NCBI GI #	13507259
NCBI GeneID	81693
Molecular Weight	47,754 Da
NCBI Official Full Name	amnionless
NCBI Official Synonym Full Names	amnion associated transmembrane protein
NCBI Official Symbol	AMN
NCBI Official Synonym Symbols	PRO1028; amnionless
NCBI Protein Information	protein amnionless
UniProt Protein Name	Protein amnionless
UniProt Gene Name	AMN
UniProt Entry Name	AMNLS_HUMAN

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
