

Human Serum Amyloid A (SAA) ELISA Kit | SAA elisa kit

Human Serum Amyloid A (SAA) ELISA Kit

CATALOG #
AAA140770

REACTIVITY
Human

PRODUCT SYNONYMS

Serum Amyloid A (SAA); Human Serum Amyloid A (SAA) ELISA Kit; SA-A; SAA1; PIG4; TP53I4; Amyloid protein A; Amyloid fibril protein AA; Serum amyloid A-1 protein; SAA elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Specificity	This assay has high sensitivity and excellent specificity for detection of Serum Amyloid A (SAA). No significant cross-reactivity or interference between Serum Amyloid A (SAA) and analogues was observed.
Sequence Length	129
Assay Type	Competitive Inhibition
Samples	Serum, Plasma, Tissue homogenates, Cell lysates, Cell culture supernates and other biological fluids
Detection Range	39.06-10,000ng/mL
Sensitivity	14.73ng/mL
Application	Enzyme-linked immunosorbent assay for Antigen Detection.
Intra-assay Precision (Precision within an assay)	3 samples with low, middle and high level Serum Amyloid A (SAA) were tested 20 times on one plate, respectively.
Inter-assay Precision (Precision between assays)	3 samples with low, middle and high level Serum Amyloid A (SAA) were tested on 3 different plates, 8 replicates in each plate.
CV(%) =	SD/meanX100
Intra-Assay	CV<10%
Inter-Assay	CV<12%
Preparation and Storage	The stability of kit is determined by the loss rate of activity. The loss rate of this kit is less than 5% within the expiration date under appropriate storage condition. To minimize extra influence on the performance, operation procedures and lab conditions, especially room temperature, air humidity, incubator temperature should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same operator from the beginning to the end.

ADDITIONAL INFORMATION

Related Product Information for SAA elisa kit	This assay employs the competitive inhibition enzyme immunoassay technique. A monoclonal antibody specific to Serum Amyloid A (SAA) has been pre-coated onto a microplate. A competitive inhibition reaction is launched between biotin labeled Serum Amyloid A (SAA) and unlabeled Serum Amyloid A (SAA) (Standards or samples) with the pre-coated antibody specific to Serum Amyloid A (SAA). After incubation the unbound conjugate is washed off. Next, avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. The amount of bound HRP conjugate is reverse proportional to the concentration of Serum Amyloid A (SAA) in the sample. After addition of the substrate solution, the intensity of color developed is reverse proportional to the concentration of Serum Amyloid A (SAA) in the sample.
Product Categories/Family for SAA elisa kit	Infection immunity; Kidney biomarker; Hepatology

NCBI AND UNIPROT INFORMATION

NCBI GI #	93352563
NCBI GeneID	678660
NCBI Accession #	NP_001035288.1
NCBI GenBank Nucleotide #	NM_001040198.1
NCBI Official Full Name	serum amyloid A protein
NCBI Official Symbol	SAA1
NCBI Official Synonym Symbols	SAA
NCBI Protein Information	serum amyloid A protein

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
