

Human Nerve Growth Factor (NGF) CLIA Kit | NGF clia kit

Human Nerve Growth Factor (NGF) CLIA Kit

CATALOG #
AAA141063

REACTIVITY
Human

PRODUCT SYNONYMS

Nerve Growth Factor (NGF); Human Nerve Growth Factor (NGF) CLIA Kit; NGFB; Beta-NGF; HSN5; NGF-B; Beta-Nerve Growth Factor; NGF clia kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Specificity	This assay has high sensitivity and excellent specificity for detection of Nerve Growth Factor (NGF). No significant cross-reactivity or interference between Nerve Growth Factor (NGF) and analogues was observed.
Sequence Length	194
Assay Type	Double-antibody Sandwich
Samples	Serum, Plasma, Tissue homogenates, Cell lysates, Cell culture supernates and other biological fluids
Detection Range	2.74-2000pg/mL
Sensitivity	0.99pg/mL
Application	Chemiluminescent immunoassay for Antigen Detection.
Intra-assay Precision (Precision within an assay)	3 samples with low, middle and high level Nerve Growth Factor (NGF) were tested 20 times on one plate, respectively.
Inter-assay Precision (Precision between assays)	3 samples with low, middle and high level Nerve Growth Factor (NGF) were tested on 3 different plates, 8 replicates in each plate.
CV(%) =	SD/meanX100
Intra-Assay	CV<10%
Inter-Assay	CV<12%
Preparation and Storage	The stability of kit is determined by the loss rate of activity. The loss rate of this kit is less than 5% within the expiration date under appropriate storage condition. To minimize extra influence on the performance, operation procedures and lab conditions, especially room temperature, air humidity, incubator temperature should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same operator from the beginning to the end.

ADDITIONAL INFORMATION

Related Product Information for NGF clia kit	The microplate provided in this kit has been pre-coated with an antibody specific to Nerve Growth Factor (NGF). Standards or samples are then added to the appropriate microplate wells with a biotin-conjugated antibody specific to Nerve Growth Factor (NGF). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. Then the mixture of substrate A and B is added to generate glow light emission kinetics. Upon plate development, the intensity of the emitted light is proportional to the Nerve Growth Factor (NGF) level in the sample or standard.;
Product Categories/Family for NGF clia kit	Cytokine; Neuroscience

NCBI AND UNIPROT INFORMATION

NCBI GI #	42409517
NCBI GeneID	58133
NCBI Accession #	NP_954680.1
NCBI GenBank Nucleotide #	NM_199210.1
Molecular Weight	21,903 Da
NCBI Official Full Name	nerve growth factor
NCBI Official Synonym Full Names	nerve growth factor b (beta polypeptide)
NCBI Official Symbol	ngfb
NCBI Official Synonym Symbols	ngf; ns:zft386; xx:zft386; zgc:109730
NCBI Protein Information	nerve growth factor
UniProt Protein Name	Nerve growth factor
UniProt Gene Name	ngf
UniProt Synonym Gene Names	ngfb; NGF; zNGF
UniProt Entry Name	NGF_DANRE

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
