

Serum Animal Biological Fluid

Normal Donkey Serum

CATALOG # AAA14387	HOST Donkey	REACTIVITY Donkey
------------------------------	-----------------------	-----------------------------

PRODUCT SYNONYMS

Serum; Normal Donkey Serum; Donkey Serum; Serum animal biological fluid

PRODUCT SPECIFICATIONS

Host	Donkey
Reactivity	Donkey
Form/Format	Clear, amber serum with no preservatives, pH 7.6
Concentration	6.9 g/dL (Refractometer) (varies by lot)
Biological Significance	In blood, the serum is the component that is neither a blood cell (serum does not contain white or red blood cells) nor a clotting factor; it is the blood plasma with the fibrinogens removed. Serum includes all proteins not used in blood clotting and all the electrolytes, antibodies, antigens, hormones, and any exogenous substances (e.g., drugs and microorganisms).
Biohazard	Use normal laboratory precautions when handling this product.
Additional Remarks	Blood is aseptically drawn from normal, healthy donor animals. Serum is collected off the clot. Upon thawing, material might contain some turbidity, flocculent material, or crystalline precipitates. This is a normal occurrence with plasma/serum products and in no way indicates that the quality of the product has been compromised.
Dry Ice Note	The product may be shipped with dry ice, and an additional fee may be added to your shipping cost.
Preparation and Storage	Upon receipt, store at -20 degree C for long term storage. Ships on Dry ice.

ADDITIONAL INFORMATION

Product Categories/Family for Serum animal biological fluid	Veterinary; Serum; Plasma & Blood; Animal Serum
