

Human Cochlin ELISA Kit | COCH elisa kit

Human Cochlin (COCH) ELISA Kit

CATALOG #
AAA144594

REACTIVITY
Human

PRODUCT SYNONYMS

Cochlin; Human Cochlin (COCH) ELISA Kit; COCH-5B2; COCH5B2; DFNA31; DFNA9; Coagulation Factor C; Limulus Polyphemus Homolog; COCH elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Specificity	This assay has high sensitivity and excellent specificity for detection of Cochlin (COCH). No significant cross-reactivity or interference between Cochlin (COCH) and analogues was observed.
Sequence Length	550
Assay Type	Double-antibody Sandwich
Samples	Tissue Homogenates, Cell Lysates And Other Biological Fluids
Detection Range	0.156-10ng/mL
Sensitivity	0.057ng/mL
Application	Enzyme-linked immunosorbent assay for Antigen Detection.
Intra-assay Precision (Precision within an assay)	3 samples with low, middle and high level Cochlin (COCH) were tested 20 times on one plate, respectively.
Inter-assay Precision (Precision between assays)	3 samples with low, middle and high level Cochlin (COCH) were tested on 3 different plates, 8 replicates in each plate.
CV(%) =	SD/meanX100
Intra-Assay	CV<10%
Inter-Assay	CV<12%
Preparation and Storage	The stability of kit is determined by the loss rate of activity. The loss rate of this kit is less than 5% within the expiration date under appropriate storage condition. To minimize extra influence on the performance, operation procedures and lab conditions, especially room temperature, air humidity, incubator temperature should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same operator from the beginning to the end.

ADDITIONAL INFORMATION

Related Product Information for COCH elisa kit	The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Cochlin (COCH). Standards or samples are then added to the appropriate microtiter plate wells with a biotin-conjugated antibody specific to Cochlin (COCH). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Cochlin (COCH), biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm ± 10nm. The concentration of Cochlin (COCH) in the samples is then determined by comparing the O.D. of the samples to the standard curve.
Product Categories/Family for COCH elisa kit	Hematology

NCBI AND UNIPROT INFORMATION

NCBI GI #	205277471
NCBI GeneID	1690
NCBI Accession #	NP_001128530.1
NCBI GenBank Nucleotide #	NM_001135058.1
Molecular Weight	53,230 Da
NCBI Official Full Name	cochlin
NCBI Official Synonym Full Names	cochlin
NCBI Official Symbol	COCH
NCBI Official Synonym Symbols	DFNA9; COCH5B2; COCH-5B2
NCBI Protein Information	cochlin
UniProt Protein Name	Cochlin
UniProt Gene Name	COCH
UniProt Synonym Gene Names	COCH5B2
UniProt Entry Name	COCH_HUMAN

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
