

Rabbit Hemoglobin (HB) ELISA Kit | HB elisa kit

Rabbit Hemoglobin (HB) ELISA Kit

CATALOG #
AAA147231

REACTIVITY
Rabbit

PRODUCT SYNONYMS

Hemoglobin (HB); Rabbit Hemoglobin (HB) ELISA Kit; Hgb; Haemoglobin; Heterotetramer(alpha-beta) 2; HB elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Rabbit
Specificity	This assay has high sensitivity and excellent specificity for detection of Hemoglobin (HB). No significant cross-reactivity or interference between Hemoglobin (HB) and analogues was observed.
Sequence Length	165
Assay Type	Competitive Inhibition
Samples	Serum, Plasma, Erythrocyte lysates and other biological fluids
Detection Range	1.23-100ug/mL
Sensitivity	0.55ug/mL
Application	Enzyme-linked immunosorbent assay for Antigen Detection.
Intra-assay Precision (Precision within an assay)	3 samples with low, middle and high level Hemoglobin (HB) were tested 20 times on one plate, respectively.
Inter-assay Precision (Precision between assays)	3 samples with low, middle and high level Hemoglobin (HB) were tested on 3 different plates, 8 replicates in each plate.
CV(%) =	SD/meanX100
Intra-Assay	CV<10%
Inter-Assay	CV<12%
Preparation and Storage	The stability of kit is determined by the loss rate of activity. The loss rate of this kit is less than 5% within the expiration date under appropriate storage condition. To minimize extra influence on the performance, operation procedures and lab conditions, especially room temperature, air humidity, incubator temperature should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same operator from the beginning to the end.

ADDITIONAL INFORMATION

Related Product Information for HB elisa kit	This assay employs the competitive inhibition enzyme immunoassay technique. A monoclonal antibody specific to Hemoglobin (HB) has been pre-coated onto a microplate. A competitive inhibition reaction is launched between biotin labeled Hemoglobin (HB) and unlabeled Hemoglobin (HB) (Standards or samples) with the pre-coated antibody specific to Hemoglobin (HB). After incubation the unbound conjugate is washed off. Next, avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. The amount of bound HRP conjugate is reverse proportional to the concentration of Hemoglobin (HB) in the sample. After addition of the substrate solution, the intensity of color developed is reverse proportional to the concentration of Hemoglobin (HB) in the sample.
Product Categories/Family for HB elisa kit	Metabolic pathway; Infection immunity; Hematology; Neuroscience

NCBI AND UNIPROT INFORMATION

NCBI GI #	162462053
NCBI GeneID	541815
NCBI Accession #	NP_001104966.1
NCBI GenBank Nucleotide #	NM_001111496.1
UniProt Accession #	Q9FY42
Molecular Weight	18,279 Da
NCBI Official Full Name	hemoglobin
NCBI Official Symbol	LOC541815
NCBI Official Synonym Symbols	GRMZM2G067402
NCBI Protein Information	hemoglobin
UniProt Protein Name	Non-symbiotic hemoglobin
UniProt Gene Name	HB
UniProt Synonym Gene Names	GLB1

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
