

Complement Factor B (CFB) ELISA Kit | CFB elisa kit

Simian Complement Factor B (CFB) ELISA Kit

CATALOG #
AAA148593

REACTIVITY
Rhesus Monkey

PRODUCT SYNONYMS

Complement Factor B (CFB); Simian Complement Factor B (CFB) ELISA Kit; CF-B; BF; BFD; CFAB; GBG; H2-Bf; PBF2; B-Factor; Properdin; Properdin factor B; C3/C5 convertase; Glycine-rich beta glycoprotein; CFB elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Rhesus Monkey
Specificity	This assay has high sensitivity and excellent specificity for detection of CFB. No significant cross-reactivity or interference between CFB and analogues was observed.
Sequence Length	761
Assay Type	Quantitative Sandwich
Samples	Simian serum, plasma and other biological fluids
Detection Range	6.25-400ng/mL
Sensitivity	< 3.07ng/mL
Intra-assay Precision	Intra-assay Precision (Precision within an assay): 3 samples with low, middle and high level CFB were tested 20 times on one plate, respectively. Intra-Assay: CV<10%
Inter-assay Precision	Inter-assay Precision (Precision between assays): 3 samples with low, middle and high level CFB were tested on 3 different plates, 8 replicates in each plate. CV(%) = SD/meanX100. Inter-Assay: CV<12%
Preparation and Storage	The stability of kit is determined by the loss rate of activity. The loss rate of this kit is less than 5% within the expiration date under appropriate storage condition. To minimize extra influence on the performance, operation procedures and lab conditions, especially room temperature, air humidity, incubator temperature should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same operator from the beginning to the end.

ADDITIONAL INFORMATION

Related Product Information for CFB elisa kit	Principle of the Assay: The microplate provided in this kit has been pre-coated with an antibody specific to CFB. Standards or samples are then added to the appropriate microplate wells with a biotin-conjugated antibody specific to CFB. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain CFB, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm ± 10nm. The concentration of CFB in the samples is then determined by comparing the O.D. of the samples to the standard curve. Intended Uses: The kit is a sandwich enzyme immunoassay for in vitro quantitative measurement of CFB in simian serum, plasma and other biological fluids.
Product Categories/Family for CFB elisa kit	Infection immunity; Immune molecule; Hematology; Autoimmunity

NCBI AND UNIPROT INFORMATION

NCBI GI #	95147674
NCBI GeneID	514076
NCBI Accession #	NP_001035616.1
NCBI GenBank Nucleotide #	NM_001040526.1
UniProt Accession #	P81187; Q2KIU6
Molecular Weight	85,366 Da
NCBI Official Full Name	complement factor B
NCBI Official Symbol	CFB
NCBI Official Synonym Symbols	BF
NCBI Protein Information	complement factor B
UniProt Protein Name	Complement factor B
UniProt Gene Name	CFB
UniProt Synonym Gene Names	BF

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
