

## FITC Rabbit IgG Isotype Control Reagent

FITC Rabbit IgG Isotype Control

CATALOG #  
**AAA148710**

HOST  
**Rabbit**

### PRODUCT SYNONYMS

FITC Rabbit IgG Isotype Control; FITC Rabbit IgG Isotype Control reagent

### PRODUCT SPECIFICATIONS

|                         |                                                         |
|-------------------------|---------------------------------------------------------|
| Host                    | Rabbit                                                  |
| Isotype                 | IgG Isotype Control                                     |
| Purity/Purification     | Protein A Affinity Chromatography                       |
| Form/Format             | PBS pH 7.4 1% BSA 50% glycerol 0.02% NaN <sub>3</sub> . |
| Concentration           | 0.45 mg/ml (varies by lot)                              |
| Source                  | Serum                                                   |
| Label                   | FITC                                                    |
| Traits                  | Liquid                                                  |
| Recommended use         | Isotype Control Antibody                                |
| Preparation and Storage | Aliquot and store at -20°C.                             |

### ADDITIONAL INFORMATION

#### Related Product Information for FITC Rabbit IgG Isotype Control reagent

Isotype control is commonly used as negative control in flow cytometry, it has no specificity for target molecules in specific experiment, but maintains all other characteristics of primary antibody used in the experiment. The purpose of isotype control is to confirm the specificity of primary antibody, in the meanwhile, it also shows the fluorescence resulting from FC receptor mediated binding and other non-specific cellular protein interactions.

**For Research Use Only.** Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
