

Horse Insulin (INS) ELISA Kit | INS elisa kit

Horse Insulin (INS) ELISA Kit

CATALOG #
AAA149972

REACTIVITY
Horse

PRODUCT SYNONYMS

Insulin (INS); Horse Insulin (INS) ELISA Kit; INS elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Horse
Specificity	This assay has high sensitivity and excellent specificity for detection of Insulin (INS). No significant cross-reactivity or interference between Insulin (INS) and analogues was observed.
Sequence Length	110
Assay Type	Competitive Inhibition
Samples	Serum, Plasma, Tissue homogenates, Cell lysates, Cell culture supernates and other biological fluids
Detection Range	123.5-10,000pg/mL
Sensitivity	53.5pg/mL
Precision	Intra-assay Precision (Precision within an assay): 3 samples with low, middle and high level Insulin (INS) were tested 20 times on one plate, respectively. Inter-assay Precision (Precision between assays): 3 samples with low, middle and high level Insulin (INS) were tested on 3 different plates, 8 replicates in each plate. CV(%) = SD/meanX100 Intra-Assay: CV<10% Inter-Assay: CV<12%
Preparation and Storage	The stability of kit is determined by the loss rate of activity. The loss rate of this kit is less than 5% within the expiration date under appropriate storage condition. To minimize extra influence on the performance, operation procedures and lab conditions, especially room temperature, air humidity, incubator temperature should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same operator from the beginning to the end.

ADDITIONAL INFORMATION

Related Product Information for INS elisa kit	This assay employs the competitive inhibition enzyme immunoassay technique. A monoclonal antibody specific to Insulin (INS) has been pre-coated onto a microplate. A competitive inhibition reaction is launched between biotin labeled Insulin (INS) and unlabeled Insulin (INS) (Standards or samples) with the pre-coated antibody specific to Insulin (INS). After incubation the unbound conjugate is washed off. Next, avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. The amount of bound HRP conjugate is reverse proportional to the concentration of Insulin (INS) in the sample. After addition of the substrate solution, the intensity of color developed is reverse proportional to the concentration of Insulin (INS) in the sample.
Product Categories/Family for INS elisa kit	Metabolic Pathway; Endocrinology; Hormone Metabolism

NCBI AND UNIPROT INFORMATION

NCBI GI #	386828
NCBI GeneID	3630
NCBI Official Full Name	insulin
NCBI Official Synonym Full Names	insulin
NCBI Official Symbol	INS
NCBI Official Synonym Symbols	IDDM; ILPR; IRDN; IDDM1; IDDM2; PNDM4; MODY10
NCBI Protein Information	insulin

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
