

Mouse Complement Component 9 (C9) ELISA Kit | C9 elisa kit

Mouse Complement Component 9 (C9) ELISA Kit

CATALOG #
AAA151273

REACTIVITY
Mouse

PRODUCT SYNONYMS

Complement Component 9 (C9); Mouse Complement Component 9 (C9) ELISA Kit; C9/Complement Component 9; C9 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Mouse
Specificity	This assay has high sensitivity and excellent specificity for detection of C9. No significant cross-reactivity or interference between C9 and analogues was observed.
Assay Type	Quantitative Sandwich
Samples	Mouse serum, plasma and other biological fluids
Detection Range	7.8-500ng/mL
Sensitivity	< 3.8ng/mL
Intra-assay Precision	Intra-assay Precision (Precision within an assay): 3 samples with low, middle and high level C9 were tested 20 times on one plate, respectively. Intra-Assay: CV<10%
Inter-assay Precision	Inter-assay Precision (Precision between assays): 3 samples with low, middle and high level C9 were tested on 3 different plates, 8 replicates in each plate. CV(%) = SD/meanX100. Inter-Assay: CV<12%
Preparation and Storage	Store at 4 degree C for 1 month/-20 degree C for long-term(within shelf life) Shelf Life: 8 months The stability of kit is determined by the loss rate of activity. The loss rate of this kit is less than 5% within the expiration date under appropriate storage condition. To minimize extra influence on the performance, operation procedures and lab conditions, especially room temperature, air humidity, incubator temperature should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same operator from the beginning to the end.

ADDITIONAL INFORMATION

Related Product Information for C9 elisa kit	Principle of the Assay: The microplate provided in this kit has been pre-coated with an antibody specific to C9. Standards or samples are then added to the appropriate microplate wells with a biotin-conjugated antibody specific to C9. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain C9, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm ± 10nm. The concentration of C9 in the samples is then determined by comparing the O.D. of the samples to the standard curve. Intended Uses: The kit is a sandwich enzyme immunoassay for in vitro quantitative measurement of C9 in mouse serum, plasma and other biological fluids.
Product Categories/Family for C9 elisa kit	Enzyme & Kinase; Metabolic pathway; Infection immunity; Immune molecule; Hematology

NCBI AND UNIPROT INFORMATION

NCBI GI #	15375312
NCBI GeneID	12279
NCBI Accession #	NP_038513.1
NCBI GenBank Nucleotide #	NM_013485.1
UniProt Accession #	P06683; Q91XA7
Molecular Weight	62,002 Da
NCBI Official Full Name	complement component C9
NCBI Official Synonym Full Names	complement component 9
NCBI Official Symbol	C9
NCBI Protein Information	complement component C9
UniProt Protein Name	Complement component C9
UniProt Gene Name	C9

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
