

Rabbit Factor VIII-related Antigen ELISA Kit | FVIIIAg elisa kit

Rabbit Factor VIII-related Antigen ELISA Kit

CATALOG #
AAA16098

REACTIVITY
Rabbit

PRODUCT SYNONYMS

Factor VIII-related Antigen; Rabbit Factor VIII-related Antigen ELISA Kit; Factor VIII-related Antigen (Rabbit); FVIIIAg elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Rabbit
Samples	Serum, plasma, cell culture supernatants, body fluid and tissue homogenate
Assay Type	Competitive
Sensitivity	0.1 ng/mL.
Preparation and Storage	Store all reagents at 2-8 degree C

Intended Uses: This F8Ag ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Rabbit F8Ag. This ELISA kit for research use only!

Principle of the Assay||F8Ag ELISA kit applies the competitive enzyme immunoassay technique utilizing a monoclonal anti-F8Ag antibody and an F8Ag-HRP conjugate. The assay sample and buffer are incubated together with F8Ag-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the F8Ag concentration since F8Ag from samples and F8Ag-HRP conjugate compete for the anti-F8Ag antibody binding site. Since the number of sites is limited, as more sites are occupied by F8Ag from the sample, fewer sites are left to bind F8Ag-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The F8Ag concentration in each sample is interpolated from this standard curve.
