

Mouse alpha Synuclein oligomer ELISA Kit | alpha-SYNo elisa kit

Mouse alpha Synuclein oligomer ELISA Kit

CATALOG #
AAA16191

REACTIVITY
Mouse

PRODUCT SYNONYMS

alpha Synuclein oligomer; Mouse alpha Synuclein oligomer ELISA Kit; Mouse a Synuclein oligomer ELISA Kit; alpha-SYNo elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Mouse
Specificity	This assay has high sensitivity and excellent specificity for detection of SNCOalpha. No significant cross-reactivity or interference between SNCOalpha and analogues was observed. NOTE: Limited by current skills and knowledge, it is impossible for us to complete the cross-reactivity detection between SNCOalpha and all the analogues, therefore, cross reaction may still exist in some cases.
Assay Type	Quantitative Sandwich
Samples	Serum, plasma, cell culture supernatants, body fluid and tissue homogenate
Sensitivity	1.0 pg/mL
Preparation and Storage	Store all reagents at 2-8 degree C.

ADDITIONAL INFORMATION

Related Product Information for alpha-SYNo elisa kit	Principle of the Assay: SNCOalpha ELISA kit applies the quantitative sandwich enzyme immunoassay technique. The microtiter plate has been pre-coated with a monoclonal antibody specific for SNCOalpha. Standards or samples are then added to the microtiter plate wells and SNCOalpha if present, will bind to the antibody pre-coated wells. In order to quantitatively determine the amount of SNCOalpha present in the sample, a standardized preparation of horseradish peroxidase (HRP)-conjugated polyclonal antibody, specific for SNCOalpha are added to each well to "sandwich" the SNCOalpha immobilized on the plate. The microtiter plate undergoes incubation, and then the wells are thoroughly washed to remove all unbound components. Next, substrate solutions are added to each well. The enzyme (HRP) and substrate are allowed to react over a short incubation period. Only those wells that contain SNCOalpha and enzyme-conjugated antibody will exhibit a change in color. The enzyme-substrate reaction is terminated by addition of a sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450 nm. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The SNCOalpha concentration in each sample is interpolated from this standard curve. Intended Uses: This SNCOalpha ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Mouse SNCOalpha. This ELISA kit for research use only, not for therapeutic or diagnostic applications!

NCBI AND UNIPROT INFORMATION

NCBI GI #	586067
NCBI GeneID	6622
Molecular Weight	13,109 Da
NCBI Official Full Name	Alpha-synuclein
NCBI Official Synonym Full Names	synuclein, alpha (non A4 component of amyloid precursor)
NCBI Official Symbol	SNCA
NCBI Official Synonym Symbols	PD1; NACP; PARK1; PARK4
NCBI Protein Information	alpha-synuclein; synuclein alpha-140; non A-beta component of AD amyloid
UniProt Protein Name	Alpha-synuclein
UniProt Gene Name	SNCA
UniProt Synonym Gene Names	NACP; PARK1; NACP
UniProt Entry Name	SYUA_HUMAN

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
