

## Rat SNCa ELISA Kit | SNCalpha elisa kit

Rat SNCa (Synuclein Alpha) ELISA Kit

CATALOG #  
**AAA163488**

REACTIVITY  
**Rat**

### PRODUCT SYNONYMS

SNCa; Rat SNCa (Synuclein Alpha) ELISA Kit; SNCalpha elisa kit

### PRODUCT SPECIFICATIONS

|                         |                                                                                                                                                            |
|-------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Reactivity              | Rat                                                                                                                                                        |
| Specificity             | This kit recognizes natural and recombinant Rat SNCalpha. No significant cross-reactivity or interference between Rat SNCalpha and analogues was observed. |
| Sequence Length         | 140                                                                                                                                                        |
| Samples                 | Serum, Plasma, Biological Fluids                                                                                                                           |
| Assay Type              | Sandwich                                                                                                                                                   |
| Detection Range         | 15.625-1000pg/mL                                                                                                                                           |
| Sensitivity             | Min: 9.375pg/mL; Max: 1000pg/mL                                                                                                                            |
| Intended Uses           | This ELISA kit applies to the in vitro quantitative determination of Rat SNCalpha concentrations in serum, plasma and other biological fluids.             |
| Preparation and Storage | Store at 4 degree C.                                                                                                                                       |

ADDITIONAL INFORMATION

|                                                    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
|----------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Related Product Information for SNCalpha elisa kit | <p><b>Principle of the assay:</b> This ELISA kit uses Sandwich-ELISA as the method. The micro ELISA plate provided in this kit has been pre-coated with an antibody specific to SNCalpha. Standards or samples are added to the appropriate micro ELISA plate wells and combined with the specific antibody. Then a biotinylated detection antibody specific for SNCalpha and Avidin-Horseradish Peroxidase (HRP) conjugate is added to each micro plate well successively and incubated. Free components are washed away. The substrate solution is added to each well. Only those wells that contain SNCalpha, biotinylated detection antibody and Avidin-HRP conjugate will appear blue in color. The enzyme-substrate reaction is terminated by the addition of a sulphuric acid solution and the color turns yellow. The optical density (OD) is measured spectrophotometrically at a wavelength of 450 nm +/- 2 nm. The OD value is proportional to the concentration of SNCalpha. You can calculate the concentration of SNCalpha in the samples by comparing the OD of the samples to the standard curve.</p> |
