

Human MTL ELISA Kit | MTL elisa kit

Human MTL (Motilin) ELISA Kit

CATALOG #
AAA163765

REACTIVITY
Human

PRODUCT SYNONYMS

MTL; Human MTL (Motilin) ELISA Kit; MTL elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Specificity	This assay has high sensitivity and excellent specificity for detection of Human MTL. No significant cross-reactivity or interference between Human MTL and analogues was observed. Note: Limited by current skills and knowledge, it is impossible for us to complete the cross- reactivity detection between Human MTL and all the analogues, therefore, cross reaction may still exist.
Sequence Length	195
Samples	Serum, Plasma, Biological Fluids
Assay Type	Competitive
Detection Range	15.625-1000pg/mL
Sensitivity	Min: 9.375pg/mL; Max: 1000pg/mL
Preparation and Storage	Store at 4 degree C.

ADDITIONAL INFORMATION

Related Product Information for MTL elisa kit	Description: The kit is a competitive enzyme immunoassay for in vitro quantitative measurement of MTL in human serum, plasma and other biological fluids Principle of the Assay: This ELISA kit uses Competitive-ELISA as the method. The microtiter plate provided in this kit has been pre-coated with Human MTL. During the reaction, Human MTL in the sample or standard competes with a fixed amount of Human MTL on the solid phase supporter for sites on the Biotinylated Detection Ab specific to Human MTL. Excess conjugate and unbound sample or standard are washed from the plate, and Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. Then a TMB substrate solution is added to each well. The enzyme-substrate reaction is terminated by the addition of a sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450 nm +/- 2 nm. The concentration of Human MTL in the samples is then determined by comparing the O.D. of the samples to the standard curve.
