

## Monkey sIgA ELISA Kit | sIgA elisa kit

Monkey sIgA (Secretory Immunoglobulin A) ELISA Kit

CATALOG #  
**AAA163795**

REACTIVITY  
**Monkey**

### PRODUCT SYNONYMS

sIgA; Monkey sIgA (Secretory Immunoglobulin A) ELISA Kit; sIgA elisa kit

### PRODUCT SPECIFICATIONS

|                         |                                                                                                                                                                            |
|-------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Reactivity              | Monkey                                                                                                                                                                     |
| Specificity             | This kit recognizes Monkey sIgA in samples. No significant cross-reactivity or interference between Monkey sIgA and analogues was observed.                                |
| Sequence Length         | 375                                                                                                                                                                        |
| Samples                 | Serum, plasma and other biological fluids                                                                                                                                  |
| Assay Type              | Quantitative Sandwich                                                                                                                                                      |
| Detection Range         | 0.31-20ng/mL                                                                                                                                                               |
| Sensitivity             | 0.19ng/mL                                                                                                                                                                  |
| Intra-assay Precision   | Intra-assay Precision (Precision within an assay): 3 samples with low, mid range and high level Monkey sIgA were tested 20 times on one plate, respectively.               |
| Inter-assay Precision   | Inter-assay Precision (Precision between assays): 3 samples with low, mid range and high level Monkey sIgA were tested on 3 different plates, 20 replicates in each plate. |
| Preparation and Storage | Store at 4 degree C.                                                                                                                                                       |

### ADDITIONAL INFORMATION

#### Related Product Information for sIgA elisa kit

Intended Uses: This ELISA kit applies to the in vitro quantitative determination of Monkey sIgA concentrations in serum, plasma and other biological fluids.

Principle of the Assay: This ELISA kit uses the Sandwich-ELISA principle. The micro ELISA plate provided in this kit has been pre-coated with an antibody specific to Monkey sIgA. Standards or samples are added to the micro ELISA plate wells and combined with the specific antibody. Then a biotinylated detection antibody specific for Monkey sIgA and Avidin-Horseradish Peroxidase (HRP) conjugate are added successively to each micro plate well and incubated. Free components are washed away. The substrate solution is added to each well. Only those wells that contain Monkey sIgA, biotinylated detection antibody and Avidin-HRP conjugate will appear blue in color. The enzyme-substrate reaction is terminated by the addition of stop solution and the color turns yellow. The optical density (OD) is measured spectrophotometrically at a wavelength of 450 nm +/- 2 nm. The OD value is proportional to the concentration of Monkey sIgA. You can calculate the concentration of Monkey sIgA in the samples by comparing the OD of the samples to the standard curve.

### NCBI AND UNIPROT INFORMATION

|                         |           |
|-------------------------|-----------|
| NCBI GI #               | 558881    |
| Molecular Weight        | 43,740 Da |
| NCBI Official Full Name | SigA      |

|                      |                                  |
|----------------------|----------------------------------|
| UniProt Protein Name | RNA polymerase sigma factor SigA |
| UniProt Gene Name    | <b>sigA</b>                      |
| UniProt Entry Name   | Q59965_SYNP2                     |

**For Research Use Only.** Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
