

Human ApoD ELISA Kit | ApoD elisa kit

Human ApoD (Apolipoprotein D) ELISA Kit

CATALOG #
AAA163976

REACTIVITY
Human

PRODUCT SYNONYMS

ApoD; Human ApoD (Apolipoprotein D) ELISA Kit; ApoD elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Specificity	This kit recognizes Human ApoD in samples. No significant cross-reactivity or interference between Human ApoD and analogues was observed.
Sequence Length	177
Assay Type	Quantitative Sandwich
Samples	Serum, plasma and other biological fluids
Detection Range	0.63-40ng/mL
Sensitivity	0.38ng/mL
Intra-assay Precision	Intra-assay Precision (Precision within an assay): 3 samples with low, mid range and high level Human ApoD were tested 20 times on one plate, respectively.
Inter-assay Precision	Inter-assay Precision (Precision between assays): 3 samples with low, mid range and high level Human ApoD were tested on 3 different plates, 20 replicates in each plate.
Preparation and Storage	Store at 4 degree C.

ADDITIONAL INFORMATION

Related Product Information for ApoD elisa kit	Principle of the Assay: This ELISA kit uses the Sandwich-ELISA principle. The micro ELISA plate provided in this kit has been pre-coated with an antibody specific to Human ApoD. Standards or samples are added to the micro ELISA plate wells and combined with the specific antibody. Then a biotinylated detection antibody specific for Human ApoD and Avidin-Horseradish Peroxidase (HRP) conjugate are added successively to each micro plate well and incubated. Free components are washed away. The substrate solution is added to each well. Only those wells that contain Human ApoD, biotinylated detection antibody and Avidin-HRP conjugate will appear blue in color. The enzyme-substrate reaction is terminated by the addition of stop solution and the color turns yellow. The optical density (OD) is measured spectrophotometrically at a wavelength of 450 nm ± 2 nm. The OD value is proportional to the concentration of Human ApoD. You can calculate the concentration of Human ApoD in the samples by comparing the OD of the samples to the standard curve. Intended Uses: This ELISA kit applies to the in vitro quantitative determination of Human ApoD concentrations in serum, plasma and other biological fluids.

NCBI AND UNIPROT INFORMATION

NCBI GI #	409248035
NCBI Accession #	YP_006888727.1
NCBI GenBank Nucleotide #	NT_187127.1
Molecular Weight	19,871 Da
NCBI Official Full Name	Apolipoprotein D Apo-D; ApoD; Flags: Precursor
UniProt Protein Name	Apolipoprotein D Apo-D; ApoD; Flags:
UniProt Gene Name	Apod
UniProt Entry Name	E9A9M9_SALET

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
