

Rat PAP ELISA Kit | PAP elisa kit

Rat PAP (Plasmin-Antiplasmin Complex) ELISA Kit

CATALOG #
AAA164061

REACTIVITY
Rat

PRODUCT SYNONYMS

PAP; Rat PAP (Plasmin-Antiplasmin Complex) ELISA Kit; PAP elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Rat
Specificity	This kit recognizes natural and recombinantRatPAP. No significant cross-reactivity or interference between RatPAP and analogues was observed.
Sequence Length	168
Samples	Serum, Plasma, Biological Fluids
Assay Type	Sandwich
Detection Range	7.813-500ng/mL
Sensitivity	Min: 4.688ng/mL; Max: 500ng/mL
Preparation and Storage	Store at 4 degree C.

ADDITIONAL INFORMATION

Related Product Information for PAP elisa kit	Intended Uses: This ELISA kit applies to the invitro quantitative determination of RatPAPconcentrations in serum, plasma and other biological fluids. Principle of the Assay: This ELISA kit uses Sandwich-ELISA as the method. The micro ELISA plate provided in this kit has been pre-coated with an antibody specific to PAP. Standards or samples are added to the appropriate micro ELISA plate wells and combined with the specific antibody. Then a biotinylated detection antibody specific for PAPand Avidin-Horseradish Peroxidase (HRP) conjugate is added to each micro plate well successively and incubated. Free components are washed away. The substrate solution is added to each well. Only those wells that contain PAP, biotinylated detection antibody and Avidin-HRP conjugate will appear blue in color. The enzyme-substrate reaction is terminated by the addition of a sulphuric acid solution and the color turns yellow. The optical density (OD) is measured spectrophotometrically at a wavelength of 450 nm +/- 2 nm. The OD value is proportional to the concentration of PAP.You can calculate the concentration of PAPin the samples by comparing the OD of the samples to the standard curve.
---	---

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
