

Mouse DLAT ELISA Kit | DLAT elisa kit

Mouse DLAT (Dihydrolipoyl Transacetylase) ELISA Kit

CATALOG #
AAA164168

REACTIVITY
Mouse

PRODUCT SYNONYMS

DLAT; Mouse DLAT (Dihydrolipoyl Transacetylase) ELISA Kit; DLAT elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Mouse
Specificity	This assay has high sensitivity and excellent specificity for detection of Mouse DLAT. No significant cross-reactivity or interference between Mouse DLAT and analogues was observed. Note: Limited by current skills and knowledge, it is impossible for us to complete the cross- reactivity detection between Mouse DLAT and all the analogues, therefore, cross reaction may still exist.
Sequence Length	553
Samples	Serum, Plasma, Biological Fluids
Assay Type	Sandwich
Detection Range	0.156-10ng/mL
Sensitivity	Min: 0.094ng/mL; Max: 10ng/mL
Preparation and Storage	Store at 4 degree C.

ADDITIONAL INFORMATION

Related Product Information for DLAT elisa kit	Description: The kit is a sandwich enzyme immunoassay for in vitro quantitative measurement of DLAT in Mouse serum, plasma and other biological fluids Principle of the Assay: This ELISA kit uses Sandwich-ELISA as the method. The micro ELISA plate provided in this kit has been pre-coated with an antibody specific to Mouse DLAT. Standards or samples are added to the appropriate micro ELISA plate wells and bound by the specific antibody. Then a biotinylated detection antibody specific for Mouse DLAT and Avidin-Horseradish Peroxidase (HRP) conjugate is added to each micro plate well successively and incubated. Free components are washed away. The substrate solution is added to each well. Only those wells that contain Mouse DLAT, biotinylated detection antibody and Avidin-HRP conjugate will appear blue in color. The enzyme-substrate reaction is terminated by the addition of a sulphuric acid solution and the color turns yellow. The optical density (OD) is measured spectrophotometrically at a wavelength of 450 nm +/- 2 nm. The OD value is proportional to the concentration of Mouse DLAT. You can calculate the concentration of Mouse DLAT in the samples by comparing the OD of the samples to the standard curve.

NCBI AND UNIPROT INFORMATION

NCBI GI #	15609352
NCBI GeneID	888777
NCBI Accession #	NP_216731.1
NCBI GenBank Nucleotide #	NC_000962.3
NCBI Official Full Name	pyruvate dehydrogenase E2 component dihydrolipoamide acyltransferase

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
