

## Mouse 25 Hydroxy Vitamin D3 ELISA Kit | 25OHVD3 elisa kit

Mouse 25 Hydroxy Vitamin D3 ELISA Kit

CATALOG #  
**AAA16566**

REACTIVITY  
**Mouse**

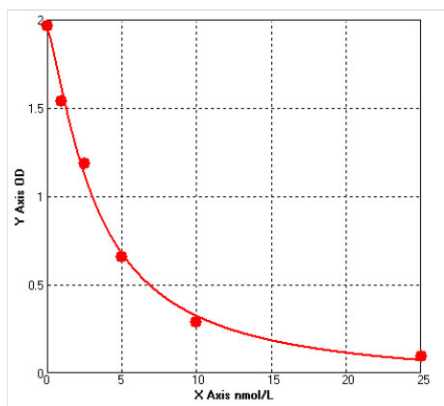

### PRODUCT SYNONYMS

25 Hydroxy Vitamin D3; Mouse 25 Hydroxy Vitamin D3 ELISA Kit; 25OHVD3 elisa kit

### PRODUCT SPECIFICATIONS

|                         |                                                                                                                                                                                                                                                                                                                                                                                                      |
|-------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Reactivity              | Mouse                                                                                                                                                                                                                                                                                                                                                                                                |
| Specificity             | This assay has high sensitivity and excellent specificity for detection of 25-OHVD3. No significant cross-reactivity or interference between 25-OHVD3 and analogues was observed. NOTE: Limited by current skills and knowledge, it is impossible for us to complete the cross-reactivity detection between 25-OHVD3 and all the analogues, therefore, cross reaction may still exist in some cases. |
| Assay Type              | Quantitative Competitive                                                                                                                                                                                                                                                                                                                                                                             |
| Samples                 | Serum, plasma, cell culture supernatants, body fluid and tissue homogenate                                                                                                                                                                                                                                                                                                                           |
| Sensitivity             | 0.1 nmol/L                                                                                                                                                                                                                                                                                                                                                                                           |
| Preparation and Storage | Store all reagents at 2-8 degree C                                                                                                                                                                                                                                                                                                                                                                   |

| Related Product Information for 25OHVD3 elisa kit | <p>Principle of the Assay: 25-OHVD3 ELISA kit applies the competitive enzyme immunoassay technique utilizing a polyclonal anti-25-OHVD3 antibody and an 25-OHVD3-HRP conjugate. The assay sample and buffer are incubated together with 25-OHVD3-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the 25-OHVD3 concentration since 25-OHVD3 from samples and 25-OHVD3-HRP conjugate compete for the anti-25-OHVD3 antibody binding site. Since the number of sites is limited, as more sites are occupied by 25-OHVD3 from the sample, fewer sites are left to bind 25-OHVD3-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The 25-OHVD3 concentration in each sample is interpolated from this standard curve.</p> <p>Intended Uses: This 25-OHVD3 ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Mouse 25-OHVD3. This ELISA kit for research use only, not for therapeutic or diagnostic applications!</p> |
