

Human MYO ELISA Kit | MYO elisa kit

Human MYO (Myoglobin) ELISA Kit

CATALOG #
AAA165776

REACTIVITY
Human

PRODUCT SYNONYMS

MYO; Human MYO (Myoglobin) ELISA Kit; MYO elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Specificity	This kit recognizes Human MYO in samples. No significant cross-reactivity or interference between Human MYO and analogues was observed.
Sequence Length	224
Samples	Serum, plasma and other biological fluids
Assay Type	Quantitative Sandwich
Detection Range	3.13-200ng/mL
Sensitivity	1.88ng/mL
Intra-assay Precision	Intra-assay Precision (Precision within an assay): 3 samples with low, mid range and high level Human MYO were tested 20 times on one plate, respectively.
Inter-assay Precision	Inter-assay Precision (Precision between assays): 3 samples with low, mid range and high level Human MYO were tested on 3 different plates, 20 replicates in each plate.
Preparation and Storage	Store at 4 degree C.

ADDITIONAL INFORMATION

Related Product Information for MYO elisa kit	Intended Uses: This ELISA kit applies to the in vitro quantitative determination of Human MYO concentrations in serum, plasma and other biological fluids. Principle of the Assay: This ELISA kit uses the Sandwich-ELISA principle. The micro ELISA plate provided in this kit has been pre-coated with an antibody specific to Human MYO. Standards or samples are added to the micro ELISA plate wells and combined with the specific antibody. Then a biotinylated detection antibody specific for Human MYO and Avidin-Horseradish Peroxidase (HRP) conjugate are added successively to each micro plate well and incubated. Free components are washed away. The substrate solution is added to each well. Only those wells that contain Human MYO, biotinylated detection antibody and Avidin-HRP conjugate will appear blue in color. The enzyme-substrate reaction is terminated by the addition of stop solution and the color turns yellow. The optical density (OD) is measured spectrophotometrically at a wavelength of 450 nm +/- 2 nm. The OD value is proportional to the concentration of Human MYO. You can calculate the concentration of Human MYO in the samples by comparing the OD of the samples to the standard curve.

NCBI AND UNIPROT INFORMATION

NCBI GI #	13654247
NCBI GeneID	17928
NCBI Accession #	NP_112466.1
NCBI GenBank Nucleotide #	NM_031189.2
UniProt Accession #	P12979
Molecular Weight	25,203 Da
NCBI Official Full Name	myogenin
NCBI Official Synonym Full Names	myogenin
NCBI Official Symbol	Myog
NCBI Official Synonym Symbols	myo; MYF4; bHLHc3
NCBI Protein Information	myogenin; MYOD1-related protein
UniProt Protein Name	Myogenin
UniProt Gene Name	Myog
UniProt Entry Name	MYOG_MOUSE

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
