

Chicken Triiodothyronine ELISA Kit | T3 elisa kit

Chicken Triiodothyronine ELISA Kit

CATALOG #
AAA16699

REACTIVITY
Chicken

PRODUCT SYNONYMS

Triiodothyronine; Chicken Triiodothyronine ELISA Kit; T3 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Chicken
Specificity	This assay has high sensitivity and excellent specificity for detection of FT3. No significant cross-reactivity or interference between FT3 and analogues was observed. NOTE: Limited by current skills and knowledge, it is impossible for us to complete the cross-reactivity detection between FT3 and all the analogues, therefore, cross reaction may still exist in some cases.
Samples	Serum, plasma, cell culture supernatants, body fluid and tissue homogenate
Assay Type	Quantitative Competitive
Sensitivity	1.0 pg/mL
Preparation and Storage	Store all reagents at 2-8 degree C

ADDITIONAL INFORMATION

Related Product Information for T3 elisa kit	Intended Uses: This FT3 ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Chicken FT3. This ELISA kit for research use only! Principle of the Assay: FT3 ELISA kit applies the competitive enzyme immunoassay technique utilizing an anti-FT3 antibody and an FT3-HRP conjugate. The assay sample and buffer are incubated together with FT3-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the FT3 concentration since FT3 from samples and FT3-HRP conjugate compete for the anti-FT3 antibody binding site. Since the number of sites is limited, as more sites are occupied by FT3 from the sample, fewer sites are left to bind FT3-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The FT3 concentration in each sample is interpolated from this standard curve.
Product Categories/Family for T3 elisa kit	Metabolism

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
