

Chicken P53 ELISA Kit | P53 elisa kit

Chicken P53 ELISA Kit

CATALOG #
AAA16764

REACTIVITY
Chicken

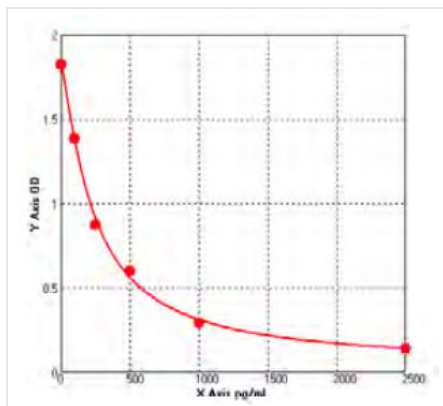

PRODUCT SYNONYMS

P53; Chicken P53 ELISA Kit; P53 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Chicken
Specificity	This assay has high sensitivity and excellent specificity for detection of P53. No significant cross-reactivity or interference between P53 and analogues was observed. NOTE: Limited by current skills and knowledge, it is impossible for us to complete the cross-reactivity detection between P53 and all the analogues, therefore, cross reaction may still exist in some cases.
Assay Type	Quantitative Competitive
Samples	Serum, plasma, cell culture supernatants, body fluid and tissue homogenate
Sensitivity	1.0 pg/mL
Preparation and Storage	Store all reagents at 2-8 degree C

ADDITIONAL INFORMATION

Related Product Information for P53 elisa kit	Principle of the Assay: P53 ELISA kit applies the competitive enzyme immunoassay technique utilizing an anti-P53 antibody and an P53-HRP conjugate. The assay sample and buffer are incubated together with P53-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the P53 concentration since P53 from samples and P53-HRP conjugate compete for the anti-P53 antibody binding site. Since the number of sites is limited, as more sites are occupied by P53 from the sample, fewer sites are left to bind P53-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The P53 concentration in each sample is interpolated from this standard curve. Intended Uses: This P53 ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Chicken P53. This ELISA kit for research use only, not for therapeutic or diagnostic applications!
