

Chicken 25 Hydroxy Vitamin D3 ELISA Kit | 25OHVD3 elisa kit

Chicken 25 Hydroxy Vitamin D3 ELISA Kit

CATALOG #
AAA16785

REACTIVITY
Chicken

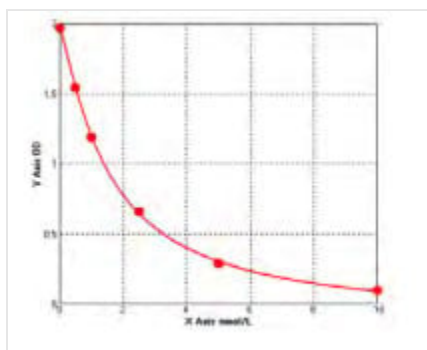

PRODUCT SYNONYMS

25 Hydroxy Vitamin D3; Chicken 25 Hydroxy Vitamin D3 ELISA Kit; 25OHVD3 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Chicken
Specificity	This assay has high sensitivity and excellent specificity for detection of 25OHVD3. No significant cross-reactivity or interference between 25OHVD3 and analogues was observed. NOTE: Limited by current skills and knowledge, it is impossible for us to complete the cross-reactivity detection between 25OHVD3 and all the analogues, therefore, cross reaction may still exist in some cases.
Assay Type	Quantitative Competitive
Samples	Serum, plasma, cell culture supernatants, body fluid and tissue homogenate
Sensitivity	0.1 nmol/L
Preparation and Storage	Store all reagents at 2-8 degree C

ADDITIONAL INFORMATION

Related Product Information for 25OHVD3 elisa kit	Principle of the Assay: 25OHVD3 ELISA kit applies the competitive enzyme immunoassay technique utilizing a polyclonal anti-25OHVD3 antibody and an 25OHVD3-HRP conjugate. The assay sample and buffer are incubated together with 25OHVD3-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the 25OHVD3 concentration since 25OHVD3 from samples and 25OHVD3-HRP conjugate compete for the anti-25OHVD3 antibody binding site. Since the number of sites is limited, as more sites are occupied by 25OHVD3 from the sample, fewer sites are left to bind 25OHVD3-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The 25OHVD3 concentration in each sample is interpolated from this standard curve. Intended Uses: This 25OHVD3 ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Chicken 25OHVD3. This ELISA kit for research use only, not for therapeutic or diagnostic applications!
Product Categories/Family for 25OHVD3 elisa kit	Metabolism

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
