ADDITIONAL INFORMATION

Related Product Information for anti-DTX3 antibody	DTX3 functions as an E3 ubiquitin ligase. It is regulator of Notch signaling, a signaling pathway involved in cell-cell communications that regulates a broad spectrum of cell-fate determinations. Probably acts both as a positive and negative regulator of Notch, depending on the developmental and cell context. Functions as an ubiquitin ligase protein in vitro, suggesting that it may regulate the Notch pathway via some ubiquitin ligase activity.
