

## Human CLDN11 (Claudin 11) CLIA Kit | CLDN11 clia kit

Human CLDN11 (Claudin 11) CLIA Kit

CATALOG #  
**AAA171066**

REACTIVITY  
**Human**

### PRODUCT SYNONYMS

CLDN11 (Claudin 11); Human CLDN11 (Claudin 11) CLIA Kit; CLDN11 clia kit

### PRODUCT SPECIFICATIONS

|                 |                                                                                                                                                |
|-----------------|------------------------------------------------------------------------------------------------------------------------------------------------|
| Reactivity      | Human                                                                                                                                          |
| Specificity     | This kit recognizes natural and recombinant CLDN11. No significant cross-reactivity or interference between CLDN11 and analogues was observed. |
| Sequence Length | 207                                                                                                                                            |
| Assay Type      | Sandwich                                                                                                                                       |
| Detection Range | 31.25-2000pg/mL                                                                                                                                |
| Sensitivity     | Min: 18.75pg/mL; Max: 2000pg/mL                                                                                                                |

### ADDITIONAL INFORMATION

#### Related Product Information for CLDN11 clia kit

**Intended Uses:** This CLIA kit applies to the in vitro quantitative determination of CLDN11 concentrations in serum, plasma and other biological fluids.

**Principle of the Assay:** This kit uses Sandwich-CLIA as the method. The micro CLIA plate provided in this kit has been pre-coated with an antibody specific to CLDN11. Standards or samples are added to the appropriate micro CLIA plate wells and combined with the specific antibody. Then a biotinylated detection antibody specific for CLDN11 and Avidin-Horseradish Peroxidase (HRP) conjugate is added to each micro plate well successively and incubated. Free components are washed away. The substrate solution is added to each well. Only those wells that contain CLDN11, biotinylated detection antibody and Avidin-HRP conjugate will appear fluorescence. The Relative light unit (RLU) value is measured spectrophotometrically by the Chemiluminescence immunoassay analyzer. The RLU value is positively associated with the concentration of CLDN11. You can calculate the concentration of CLDN11 in the samples by comparing the RLU value of the samples to the standard curve.

NCBI AND UNIPROT INFORMATION

|                          |               |
|--------------------------|---------------|
| NCBI GI #                | 75775514      |
| NCBI GeneID              | 508268        |
| Molecular Weight         | 22,012 Da     |
| NCBI Official Full Name  | Claudin 11    |
| NCBI Official Symbol     | CLDN11        |
| NCBI Protein Information | claudin-11    |
| UniProt Protein Name     | Claudin-11    |
| UniProt Gene Name        | <b>CLDN11</b> |
| UniProt Entry Name       | CLD11_BOVIN   |

**For Research Use Only.** Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
